SUBJECT and TITLE INDEX

POLYMER ENGINEERING AND SCIENCE
VOLUME 14
1974

A

1. ABS

The Plasticating Process in Injection Molding, R. C. Donovan, *February, p. 101*
Structural Relationship Between Thermomechanical History and Strength of Polymeric Solids, S. Matsuoka, *March, p. 162*
Key Indicators for Plastics Performance in Consumer Products, R. S. Hagan and J. R. Thomas, *March, p. 177*
The Solution of Plastics Prediction Problems by Thermoanalytical Techniques, H. E. Bair, *March, p. 202*
Simulation of the Mold-Filling Process, P.-C. Wu, C. F. Huang, and C. G. Gogos, *March, p. 223*
A Step Toward Molecular-Level Understanding of the Toughness of Glassy Plastics, A. C. Knight, *October, p. 687*
Dilatometric Studies of Polymers Undergoing High and Low Rate Tensile Deformation, L. C. Cessna, *October, p. 696*
The Influence of Additives on the Flow Behavior of ABS, L. L. Blyler, Jr., *November, p. 806*
Thermoforming Conditions in Transparent/Opaque Coextruded Sheet, R. C. Progelhof and J. L. Throne, *November, p. 810*
Cold Rolling of Polymers: 4. Toughness Enhancement in Amorphous Polymers, L. J. Broutman and S. Krishnakumar, *December, p. 823*
Effects of a Fluid Environment on the Stiffness of Polymers, D. McCammond and C. A. Ward, *December, p. 831*

2. Absorptance

Polymer Surface Reflectance-Absorptance Characteristics, J. R. Hallman, J. R. Welker and C. M. Sliepcevich, *October, p. 717*
Predicting Radiant Energy Transmission Through Polymer Sheets, R. C. Progelhof and J. L. Throne, *November, p. 760*
Thermoforming Conditions in Transparent/Opaque Coextruded Sheet, R. C. Progelhof and J. L. Throne, *November, p. 810*

3. Acetals

Superdawn Crystalline Polymers: A New Class of High-Strength Fiber, E. S. Clark and L. S. Scott, *October, p. 682*

4. Acid Resistance

Photocrosslinkable Polyphosphonates Having Unusual Resistance to Acids, D. G. Borden *July, p. 487*

5. Acrylics

Cold Rolling of Polymers: 4. Toughness Enhancement in Amorphous Polymers, L. J. Broutman and S. Krishnakumar, *December, p. 823*

6. Acrylonitrile Copolymers

Capillary Rheometry of Raw Elastomers, Butadiene-Acrylonitrile Copolymers, N. Nakajima and E. A. Collins, *February, p. 137*
Prediction and Evaluation of the Susceptibilities of Glass Thermoplastics to Environmental Stress Cracking, L. F. Henry, *March, p. 167*
The Solution of Plastics Prediction Problems by Thermoanalytical Techniques, H. E. Bair, *March, p. 202*
Tensile Crazing and Shear Banding of Styrene A: Temperature and Rate Effects, J. N. Sultan and F. J. McGarry, *April, p. 282*
A Step Toward Molecular-Level Understanding of the Toughness of Glassy Plastics, A. C. Knight, *October, p. 687*

7. Additives

Structure and Properties of Flexible Vinyl Foams, R. D. Deanin, V. C. Kapasi, C. N. Georgacopoulos and R. J. Picard, *March, p. 193*
The Solution of Plastics Prediction Problems by Thermoanalytical Techniques, H. E. Bair, *March, p. 202*
Melt Viscosity of Poly(Vinyl Chloride) Formulations, L. A. Utracki, *April, p. 308*
Antioxidant-Associated Color Problems in Vinyl Foams, J. T. Renshaw and J. A. Cannon, *June, p. 473*
The Interaction of 5 KeV Electrons with Polymers of Methyl Isopropenyl Ketone, A. W. Levine, M. Kaplan, and E. S. Poliniak, *July, p. 518*
Factors Affecting the Sensitivity of E-Beam Resists, T. L. Brewer, *July, p. 534*
The Influence of Additives on the Flow Behavior of ABS, L. L. Blyler, Jr., *November, p. 806*

8. Adhesion

Stress-strain Behavior of Polychloroprene Vulcanizates Containing Polymer-gel Particles, N. Kawasaki, *February, p. 155*

9. Adhesives

Characterization and Control of a Structural Epoxy Adhesive, R. Fountain, *September, p. 597*

10. Aluminum Soap

Prediction of Melt Elasticity From Viscosity Data, S. I. Abdel-Khalik, O. Hassager, and R. B. Bird, *December, p. 859*

11. Analysis

The Solution of Plastics Prediction Problems by Thermoanalytical Techniques, H. E. Bair, *March, p. 202*

12. Antioxidants

Antioxidant-Associated Color Problems in Vinyl Foams, J. T. Renshaw and J. A. Cannon, *June, p. 473*

13. Asbestos-Cement

Mechanical Properties of Impregnated Asbestos-Cement, P. Godard, P. Delvaux, M. Della Faille, and J. P. Mercier, *June, p. 429*

14. Automation

Computer Simulation Study of Images in Contact and Near-Contact Printing, B. J. Lin, *July, p. 498*
A Design Approach to a Computer-Controlled Injection-Molding Machine, C. Y. W. Ma, *November, p. 678*
Extruder Scale-Up by Computer, B. H. Maddock, *December, p. 853*

SUBJECT and TITLE INDEX

POLYMER ENGINEERING AND SCIENCE
VOLUME 14
1974

A

1. ABS

The Plasticating Process in Injection Molding, R. C. Donovan, *February, p. 101*
Structural Relationship Between Thermomechanical History and Strength of Polymeric Solids, S. Matsuoka, *March, p. 162*
Key Indicators for Plastics Performance in Consumer Products, R. S. Hagan and J. R. Thomas, *March, p. 177*
The Solution of Plastics Prediction Problems by Thermoanalytical Techniques, H. E. Bair, *March, p. 202*
Simulation of the Mold-Filling Process, P.-C. Wu, C. F. Huang, and C. G. Gogos, *March, p. 223*
A Step Toward Molecular-Level Understanding of the Toughness of Glassy Plastics, A. C. Knight, *October, p. 687*
Dilatometric Studies of Polymers Undergoing High and Low Rate Tensile Deformation, L. C. Cessna, *October, p. 696*
The Influence of Additives on the Flow Behavior of ABS, L. L. Blyler, Jr., *November, p. 806*
Thermoforming Conditions in Transparent/Opaque Coextruded Sheet, R. C. Progelhof and J. L. Throne, *November, p. 810*
Cold Rolling of Polymers: 4. Toughness Enhancement in Amorphous Polymers, L. J. Broutman and S. Krishnakumar, *December, p. 823*
Effects of a Fluid Environment on the Stiffness of Polymers, D. McCammond and C. A. Ward, *December, p. 831*

2. Absorptance

Polymer Surface Reflectance-Absorptance Characteristics, J. R. Hallman, J. R. Welker and C. M. Sliepcevich, *October, p. 717*
Predicting Radiant Energy Transmission Through Polymer Sheets, R. C. Progelhof and J. L. Throne, *November, p. 760*
Thermoforming Conditions in Transparent/Opaque Coextruded Sheet, R. C. Progelhof and J. L. Throne, *November, p. 810*

3. Acetals

Superdawn Crystalline Polymers: A New Class of High-Strength Fiber, E. S. Clark and L. S. Scott, *October, p. 682*

4. Acid Resistance

Photocrosslinkable Polyphosphonates Having Unusual Resistance to Acids, D. G. Borden *July, p. 487*

5. Acrylics

Cold Rolling of Polymers: 4. Toughness Enhancement in Amorphous Polymers, L. J. Broutman and S. Krishnakumar, *December, p. 823*

6. Acrylonitrile Copolymers

Capillary Rheometry of Raw Elastomers, Butadiene-Acrylonitrile Copolymers, N. Nakajima and E. A. Collins, *February, p. 137*
Prediction and Evaluation of the Susceptibilities of Glass Thermoplastics to Environmental Stress Cracking, L. F. Henry, *March, p. 167*
The Solution of Plastics Prediction Problems by Thermoanalytical Techniques, H. E. Bair, *March, p. 202*
Tensile Crazing and Shear Banding of Styrene A: Temperature and Rate Effects, J. N. Sultan and F. J. McGarry, *April, p. 282*
A Step Toward Molecular-Level Understanding of the Toughness of Glassy Plastics, A. C. Knight, *October, p. 687*

7. Additives

Structure and Properties of Flexible Vinyl Foams, R. D. Deanin, V. C. Kapasi, C. N. Georgacopoulos and R. J. Picard, *March, p. 193*
The Solution of Plastics Prediction Problems by Thermoanalytical Techniques, H. E. Bair, *March, p. 202*
Melt Viscosity of Poly(Vinyl Chloride) Formulations, L. A. Utracki, *April, p. 308*
Antioxidant-Associated Color Problems in Vinyl Foams, J. T. Renshaw and J. A. Cannon, *June, p. 473*
The Interaction of 5 KeV Electrons with Polymers of Methyl Isopropenyl Ketone, A. W. Levine, M. Kaplan, and E. S. Poliniak, *July, p. 518*
Factors Affecting the Sensitivity of E-Beam Resists, T. L. Brewer, *July, p. 534*
The Influence of Additives on the Flow Behavior of ABS, L. L. Blyler, Jr., *November, p. 806*

8. Adhesion

Stress-strain Behavior of Polychloroprene Vulcanizates Containing Polymer-gel Particles, N. Kawasaki, *February, p. 155*

9. Adhesives

Characterization and Control of a Structural Epoxy Adhesive, R. Fountain, *September, p. 597*

10. Aluminum Soap

Prediction of Melt Elasticity From Viscosity Data, S. I. Abdel-Khalik, O. Hassager, and R. B. Bird, *December, p. 859*

11. Analysis

The Solution of Plastics Prediction Problems by Thermoanalytical Techniques, H. E. Bair, *March, p. 202*

12. Antioxidants

Antioxidant-Associated Color Problems in Vinyl Foams, J. T. Renshaw and J. A. Cannon, *June, p. 473*

13. Asbestos-Cement

Mechanical Properties of Impregnated Asbestos-Cement, P. Godard, P. Delvaux, M. Della Faille, and J. P. Mercier, *June, p. 429*

14. Automation

Computer Simulation Study of Images in Contact and Near-Contact Printing, B. J. Lin, *July, p. 498*
A Design Approach to a Computer-Controlled Injection-Molding Machine, C. Y. W. Ma, *November, p. 678*
Extruder Scale-Up by Computer, B. H. Maddock, *December, p. 853*

B

15. Biochemisty

Protein Structures and Protein Fibers—A Review, F. F. Huang and C. K. Rha, *February, p. 81*

16. Birefringence

Cold Rolling of Polymers—2. Toughness Enhancement in Amorphous Polycarbonates, L. J. Broutman and S. M. Krishnakumar, *April, p. 249*

Elastic Fracture of Polystyrene Solutions, J. H. Southern and D. R. Paul, *August, p. 560*

Packing and Discharge in Injection Molding, Y. T. Koita, *December, p. 840*

C

17. Catalysts

Polymerization of Methyl Methacrylate with Ziegler-Natta Catalysts, S. L. Kapur and A. B. Deshpande, *April, p. 276*

18. Cellulose Acetate

The Electret Effect in Cellulose Acetate Reverse Osmosis Membranes, R. A. Wallace and R. J. Gable, *February, p. 92*

19. Characterization

Characterization of Vinyl Chloride-Propylene Copolymers, R. K. S. Chan and C. H. Worman, *May, p. 389*

20. Coating

Blade-Coating of a Viscoelastic Fluid, Y. Greener and S. Middleman, *November, p. 791*

21. Cold Rolling

Cold Rolling of Polymers—2. Toughness Enhancement in Amorphous Polycarbonates, L. J. Broutman and S. M. Krishnakumar, *April, p. 249*

Cold Rolling of Polymers—3. Properties of Rolled Crystallized Polycarbonates, T. Kobayashi and L. J. Broutman, *April, p. 260*

Cold Rolling of Polymers 4. Toughness Enhancement is Amorphous Polymers L. J. Broutman and S. Krishnakumar, *December, p. 823*

22. Color

Antioxidant-Associated Color Problems in Vinyl Foams, J. T. Renshaw and J. A. Cannon, *June, p. 473*

23. Composite

Time-Temperature Superposition in Two-Phase Polyblends, D. Kaplan and N. W. Tschoegl, *January, p. 43*

Morphology of a Polyurethane-Polyacrylate Interpenetrating Polymer Network, K. C. Frisch, D. Klempner, S. Migdal, H. L. Frisch, and H. Ghiradella, *January, p. 76*

Chemical Thickening of Low Profile Polyester Resin Systems, F. R. Volgstadt and C. L. Sieglaff, *February, p. 143*

The Processing and Aging of Boron/Epoxy Composite Materials, J. F. Jones, T. T. Bartels, and R. Fountain, *March, p. 240*

Liquid Flow Through Aligned Fiber Beds, J. G. Williams, C. E. M. Morris, and B. C. Ennis, *June, p. 413*

A Theoretical Study of the Effect of an Interfacial Layer on the Properties of Composites, L. J. Broutman and B. D. Agarwal, *August, p. 581*

Short- and Long-Term Strength Characteristics of Particulate-Filled Cast Epoxy Resin, H. Hojo, W. Toyoshima, M. Tamura, and N. Kawamura, *September, p. 604*

The Mechanical Properties of Oriented Discontinous Fiber-Reinforced Thermoplastics. 1. Unidirectional Fiber Orientation, B. F. Blumentritt, B. T. Vu, and S. L. Cooper, *September, p. 633*

The Reinforcement of Epoxy Resins With Potassium Titanate Whiskers, P. K. Mallick and L. J. Broutman, *September, p. 656*

Stability of Polymer Composites as Positive Temperature-Coefficient Resistors, J. Meyer, *October, p. 706*

24. Composition

The Solution of Plastics Prediction Problems by Thermoanalytical Techniques, H. E. Bair, *March, p. 202*

The Concentration and Possible Source of Unstable Sites in PVC, A. R. Berens, *May, p. 318*

25. Conductivity

Transport Properties of Polyvinylpyridinium Anion-Exchange Membranes, R. A. Wallace and N. V. Vijayaraghavan, *September, p. 674*

26. Consumer Products

Key Indicators for Plastics Performance in Consumer Products, R. S. Hagan and J. R. Thomas, *March, p. 177*

27. Copolymers

Characterization of Vinyl Chloride-Propylene Copolymers, R. K. S. Chan and C. H. Worman, *May, p. 389*

Effects of a Fluid Environment on the Stiffness of Polymers, D. McCammond and C. A. Ward, *December, p. 831*

Segmented Polyether Ester Copolymers—A New Generation of High Performance Thermoplastic Elastomers, G. K. Hoeschele, *December, p. 848*

28. Cracking

Prediction and Evaluation of the Susceptibilities of Glassy Thermoplastics to Environmental Stress Cracking, L. F. Henry, *March, p. 167*

Crack Propagation in Polycarbonate, A. P. Glover, F. A. Johnson and J. C. Radon, *June, p. 420*

29. Crazing

Tensile Crazing and Shear Banding of Styrene A: Temperature and Rate Effects, J. N. Sultan and F. J. McGarry, *April, p. 282*

Vapor and Liquid Equilibria in Glassy Polyblends of Polystyrene and Poly(2, 6-Dimethyl-1, 4-Phenylene Oxide) Part I, C. H. M. Jacques and H. B. Hopfenberg, *June, p. 441*

Kinetics of Vapor and Liquid Transport in Glassy Polyblends of Polystyrene and Poly(2, 6-Dimethyl-1, 4-Phylene Oxide) Part II, C. H. M. Jacques and H. B. Hopfenberg, *June, p. 449*

A Step Toward Molecular-Level Understanding of the Toughness of Glassy Plastics, A. C. Knight, *October, p. 687*

30. Creep

Rapid Flexural Creep and Engineering Analysis for Product Design of a Propylene Copolymer, C. J. Aloisio, Jr. and R. R. Cammons, *March, p. 189*

A Design Approach for Thermoplastic Flexure Components Subjected to Cyclic Loading, D. McCammond and F. Nakatsumi, *August, p. 545*

A Comparison Between Simple Shear, Elongation, and Equal Biaxial Extension Deformations, F. N. Cogswell and D. R. Moore, *August, p. 573*

16-Year Creep of Polyethylene and PVC, W. N. Findley and J. F. Tracy, *August, p. 577*

The Anisotropy of Creep Behavior in Oriented Thermoplastics, M. W. Darlington and D. W. Saunders, *September, p. 616*

Mechanical Properties of Certain Oriented Crystalline Polymers, H. W. Starkweather, Jr., T. F. Jordan, and G. B. Dunnington, *October, p. 678*

Characterization of Mechanical Properties of Thermoplastic Films by Creep Measurements, J. R. Huntsberger, *October, p. 702*

Thermal Expansion Instability and Effect on Creep of a Highly Crosslinked Polyurethane, W. N. Findley and R.M. Reed, *October, p. 724*

Heat Distortion and Mechanical Properties of Polymers by Thermal-Mechanical Analysis, A. T. Riga, *November, p. 764*

Effects of a Fluid Environment on the Stiffness of Polymers, D. McCammond and C. A. Ward, *December, p. 831*

31. Crosslinking

Photocrosslinkable Polyphosphonates Having Unusual Resistance to Acids, D. G. Borden, *July, p. 487*

Behavior of Zirconium Compounds in Polymers—A Review, W. B. Blumenthal, *November, p. 754*

32. Crystallinity

Melting of Crystallites in Polymers With Low Degree of Crystallinity Under Shear Flow Conditions. 1: Poly(vinyl chloride), J. Lyngaae-Jørgensen, *May, p. 342*

Polyvinyl Chloride Insoluble Gels: Their Structure and Effect on Properties of Cast Films, F. E. Filisko, *May, p. 352*

The Influence of Crystallinity on the Beta-Transition in Poly(Vinyl Chloride), E. R. Harrell, Jr. and R. P. Chartoff, *May, p. 362*

Crystallization of Polyethylene Oxide Under Shear, A. K. Fritzsche and F. P. Price, *June, p. 401*

Why Do Polymer Molecules Fold? P. H. Lindenmeyer, *June, p. 456*

Stability of Polymer Composites as Positive-Temperature-Coefficient Resistors, J. Meyer, *October, p. 706*

33. Crystallites

The Role of Crystallite Dimensions in Mechanical and Diffusion Characteristics of Uniaxially Oriented Polymers, D. C. Prevorsek and R. K. Sharma, *November, p. 778*

34. Crystallization

Cold Rolling of Polymers—3: Properties of Rolled Crystallized Polycarbonates, T. Kobayashi and L. J. Broutman, *April, p. 260*

Crystallization of Polyethylene Oxide Under Shear, A. K. Fritzsche and F. P. Price, *June, p. 401*

Why Do Polymer Molecules Fold? P. H. Lindenmeyer, *June, p. 456*

35. Cure

The Processing and Aging of Boron/Epoxy Composite Materials, J. F. Jones, T. T. Bartels, and R. Fountain, *March, p. 240*

Prediction of Diallyl Phthalate Molding Performance from Laboratory Tests—I. Characterization and Quality Control of Diallyl Phthalate Compounds, R. Slysh, A. C. Hettinger, and K. E. Guyler, *April, p. 264*

D

36. Decomposition

The Concentration and Possible Source of Unstable Sites in PVC, A. R. Berens, *May, p. 318*

37. Deformation

Free Radical Formation in Oriented Polybutadiene During Mechanical Deformation Below T_g, W. T. Mead and P. E. Reed, *January, p. 22*

Stress-strain Behavior of Polychloroprene Vulcanizates Containing Polymer-gel Particles, N. Kawasaki, *February, p. 155*

Strain History of the Melt in Film Blowing, R. Farber and J. Dealy, *June, p. 435*

A Design Approach for Thermoplastic Flexure Components Subjected to Cyclic Loading, D. McCammond and F. Nakatsumi, *August, p. 545*

A Comparison Between Simple Shear, Elongation, and Equal Biaxial Extension Deformations, F. N. Cogswell and D. R. Moore, *August, p. 573*

The Anisotropy of Creep Behavior in Oriented Thermoplastics, M. W. Darlington and D. W. Saunders, *September, p. 616*

Plastic Deformation and Structure of Extruded Polymer Solids, A. Peterlin, *September, p. 627*

Mechanical Properties of Certain Oriented Crystalline Polymers, H. W. Starkweather, Jr., T. F. Jordan, and G. B. Dunnington, *October, p. 678*

A Step Toward Molecular-Level Understanding of the Toughness of Glassy Plastics, A. C. Knight, *October, p. 687*

The Effect of Sudden Strain-Rate Change on the Yield Behavior of Bisphenol-A Polycarbonate, A. F. Yee and P. B. Detorres, *October, p. 691*

Dilatometric Studies of Polymers Undergoing High and Low Rate Tensile Deformation, L. C. Cessna, *October, p. 696*

Effects of a Fluid Environment on the Stiffness of Polymers, D. McCammond and C. A. Ward, *December, p. 831*

38. Degradation

Infrared Reflection Studies of Metal-Polymer Interfaces, M. G. Chan and D. L. Allara, *January, p. 12*

Key Indicators for Plastics Performance in Consumer Products, R. S. Hagan and J. R. Thomas, *March, p. 177*

The Weathering Degradation of Polyolefins, B. Baum, *March, p. 206*

Phenylation of PVC With Triphenylaluminum and Related Model Reactions, J. P. Kennedy and M. Ichikawa, *May, p. 322*

The Interaction of 5 KeV Electrons with Polymers of Methyl Isopropenyl Ketone, A. W. Levine, M. Kaplan, and E. S. Poliniak, *July, p. 518*

Molding Polycarbonate: Moisture Degradation Effect on Physical and Chemical Properties, T. S. Long and R. J. Sokol, *December, p. 817*

39. Density

The Mechanical Properties of High-Density Rigid Polyurethane Foams in Compression: I. Molulus, P. J. Phillips and N. R. Waterman, *January, p. 67*

The Mechanical Properties of High-Density Rigid Polyurethane Foams in Compression: II. Yield Behavior, N. R. Waterman and P. J. Phillips, *January, p. 72*

Structure and Properties of Flexible Vinyl Foams, R. D. Deanin, V. C. Kapasi, C. N. Georgacopoulos, and R. J. Picard, *March, p. 193*

The Weathering Degradation of Polyolefins, B. Baum, *March, p. 206*

Vapor and Liquid Equilibria in Glassy Polyblends of Polystyrene and Poly(2,6-Dimethyl-1,4-Phenylene Oxide) Part I, C. H. M. Jacques and H. B. Hopfenberg, *June, p. 441*

Mechasism of Refractive Index Increase in Photosensitized Poly(Methyl Methacrylate), M. J. Bowden, E. A. Chandross, and I. P. Kaminow, *July, p. 494*

40. Desalination

The Electret Effect in Cellulose Acetate Reverse Osmosis Membranes, R. A. Wallace and R. J. Gable, *February, p. 72*

41. Design

Rapid Flexural Creep and Engineering Analysis for Product Design of a Propylene Copolymer, C. J. Aloisio, Jr. and R. R. Cammons, *March, p. 189*

Design of Extruder Dies Using Thermoplastics Melt Properties Data, P. C. Powell, *April, p. 298*

A Design Approach to a Computer-Controlled Injection-Molding Machine, C. Y. W. Ma, *November, p. 768*

42. Diallyl Phthalate

Prediction of Diallyl Phthalate Molding Performance from Laboratory Tests—I. Characterization and Quality Control of Diallyl Phthlate Compounds, R. Slysh, A. C. Hettinger, and K. E. Guyler, *April, p. 264*

Prediction of Diallyl Phthalate Molding Performance from Laboratory Tests—II. Comparison of Mechanical Spectrometer and Brabender Torque Rheometer, P. E. Willard, *April, p. 273*

43. Dielectric Properties

A Dynamical Theory of Elastic Micro-Dielectric Polymers, M. Shahinpoor and H. Kalhor, *June, p. 464*

44. Diffraction

Flash Exposure System for Thin Photoresist Films, D. E. O'Hora and W. F. Beuschel, *July, p. 509*

E

45. Economics

The SPE International Award Address—1973: The Development of Impact Polystrene—A Review, J. L. Amos, *January, p. 1*

46. Elasticity

Thermodynamics of Dissipative Materials with Entropic Elasticity, G. Astarita, *October, p. 730*

Blade-Coating of a Viscoelastic Fluid, Y. Greener and S. Middleman, *November, p. 791*

Packing and Discharge in Injection Molding, Y. T. Koita, *December, p. 840*

Prediction of Melt Elasticity From Viscosity Data, S. I. Abdel-Khalik, O. Hassager, and R. B. Bird, *December, p. 859*

47. Elastomers

Capillary Rheometry of Raw Elastomers, Butadiene-Acrylonitrile Copolymers, N. Nakajima and E. A. Collins, *February, p. 137*

Linear Polycarboranesiloxanes, M. B. Roller and J. K. Gillham, *August, p. 567*

Heat Distortion and Mechanical Properties of Polymers by Thermal-Mechanical Analysis, A. T. Riga, *November, p. 764*

Segmented Polyether Ester Copolymers—A New Generation of High Performance Thermoplastic Elastomers, G. K. Hoeschele, *December, p. 848*

48. Electrets

The Electret Effect in Cellulose Acetate Reverse Osmosis Membranes, R. A. Wallace and R. J. Gable, *February, p. 92*

49. Electrical Properties

Analyses for Mechanical and Electrical Properties of Epoxy Resins Used as Potting Compounds, R. Fountain, *June, p. 478*

Transport Properties of Polyvinylpyridinium Anion-Exchange Membranes, R. A. Wallace and N. V. Vijayaraghavan, *September, p. 674*

50. Electron Beam Processing

Vapor Development of Poly(Olefin Sulfone) Resists, M. J. Bowden and L. F. Thompson, *July, p. 525*

Electron Beam Processing Systems (A State of the Art Review), M. Hatzakis, *July, p. 516*

The Interaction of 5 KeV Electrons with Polymers of Methyl Isopropenyl Ketone, A. W. Levine, M. Kaplan, and E. S. Poliniak, *July, p. 518*

Lithography and Radiation Chemistry of Epoxy Containing Negative Electron Resist, L. F. Thompson, E. D. Feit, and R. D. Heidenreich, *July, p. 529*

Variable Development Response of Resists Using Electron Beam Lithography: Methods and Applications, R. C. Henderson and R. F. W. Pease, *July, p. 538*

51. Electron Resists

Electron Beam Processing Systems (A State of the Art Review), M. Hatzakis, *July, p. 516*

Vapor Development of Poly (Olefin Sulfone) Resists, M. J. Bowden and L. F. Thompson, *July, p. 525*

Lithography and Radiation Chemistry of Epoxy Containing Negative Electron Resists, L. F. Thompson, E. D. Feit, and R. D. Heidenreich, *July, 529*

Factors Affecting the Sensitivity of E-Beam Resists, T. L. Brewer, *July, p. 534*

Variable Development Response of Resists Using Electron Beam Lithography: Methods and Applications, R. C. Henderson and R. F. W. Pease, *July, p. 538*

52. Energy Transfer

Photochemistry in the Solid Phase, J. E. Guillet, *July, p. 482*

53. Epoxy

Time-Temperature Superpositioning of Viscosity-Time Profiles of Three High Temperature Epoxy Resins, R. P. White, Jr., *January, p. 50*

The Processing and Aging of Boron/Epoxy Composite Materials, J. F. Jones, T. T. Bartels, and R. Fountain, *March, 240*

Liquid Flow Through Aligned Fiber Beds, J. G. Williams, C. E. M. Morris, and B. C. Ennis, *June, p. 413*

Analyses for Mechanical and Electrical Properties of Epoxy Resins Used as Potting Compiunds, R. Fountain, *June, p. 478*

Epoxy Photopolymers in Photoimaging and Photofabrication, S. I. Schlesinger, *July, p. 513*

Lithography and Radiation Chemistry of Epoxy Containing Negative Electron Resists, L. F. Thompson, E. D. Feit, and R. D. Heidenreich, *July, p. 529*

Characterization and Control of a Structural Epoxy Adhesive, R. Fountain, *September, p. 597*

Short- and Long-Term Strength Characteristics of Particulate-Filled Cast Epoxy Resin, H. Hojo, W. Toyoshima, M. Tamura, and N. Kawamura, *September, p. 604*

The Reinforcement of Epoxy Resins With Potassium Titanate Whiskers, P. K. Mallick and L. J. Broutman, *September, p. 656*

54. Extruders

Screw Horsepower Dependence on Screw Speed and Size—Theory and Experiment, C. I. Chung, R. J. Nichols, and G. A. Kruder, *January, p. 28*

Theoretical Model for Nonintermeshing Twin Screw Extruders, A. Kaplan and Z. Tadmor, *January, p. 58*

Dynamic Model if a Plasticating Extruder, Z. Tadmor, S. D. Lipshitz, and R. Lavie, *February, p. 112*

Design of Extruder Dies Using Thermoplastics Melt Properties Data, P. C. Powell, *April, p. 298*

Pressure Generation Mechanisms in the Feed Section of Screw Ertruders, J. G. A. Lovegrove and J. G. Williams, *August, p. 589*

Extruder Scale-Up by Computer, B. H. Maddock, *December, p. 853*

55. Extrusion

Screw Horsepower Dependence on Screw Speed and Size—Theory and Experiment, C. I. Chung, R. J. Nichols, and G. A. Kruder, *January, p. 28*

Theoretical Model for Nonintermeshing Twin Screw Extruders, A. Kaplan and Z. Tadmor, *January, p. 58*

Dynamic Model of a Plasticating Extruder, Z. Tadmor, S. D. Lipshitz, and R. Lavie, *February, p. 112*

Rheological Analysis of Stabilizing Forces in Wire-Coating Dies, Z. Tadmor and R. B. Rird, *February, p. 124*

Design of Extruder Dies Using Thermoplastics Melt Properties Data, P. C. Powell, *April, p. 298*

The Influence of Stabilizers on the Fusion of Rigid Poly(Vinyl Chloride), F. R. Kulas and N. P. Thorshaug, *May, p. 366*

Hydrostatic Extrusion of Solid Polyethylene, L. A. Davis, *September, p. 641*

The Significance of Capillary Rheology Testing Temperature for Predicting PVC Extrudability, P. L. Shah, *November, p. 773*

Extruder Scale-Up by Computer, B. H. Maddock, *December, p. 853*

F

56. Fatigue

Mechanical Properties of Certain Oriented Crystalline Polymers, H. W. Starkweather, Jr., T. F. Jordan, and G. B. Dunnington, *October, p. 678*

Nature of Fatigue Behavior and Effect of Flaw Size in Polystyrene, A. D. McMaster, D. R. Morrow, and J. A. Sauer, *November, p. 801*

57. Fibers

Protein Structures and Protein Fibers—A Review, F. F. Huang and C. K. Rha, *February, p. 81*

Liquid Flow Through Aligned Fiber Beds, J. G. Williams, C. E. M. Morris, and B. C. Ennis, *June, p. 413*

A Theoretical Study of the Effect of an Interfacial Layer on the Properties of Composites, L. J. Broutman and B. D. Agarwal, *August, p. 581*

Strain Recovery of Polyester and Nylon 66 Monofilaments Under Various Temperature Histories, A. C. Lunn, B-L. Lee, and I. V. Yannas, *September, p. 610*

The Mechanical Properties of Oriented Discontinuous Fiber-Reinforced Thermoplastics. 1. Unidirectional Fiber Orientation, B. F. Blumentritt, B. T. Vu, and S. L. Cooper, *September, p. 633*

The Reinforcement of Epoxy Resins With Potassium Titonate Whiskers, P. K. Mallick and L. J. Broutman, *September, p. 656*

Superdawn Crystalline Polymers: A New Class of High-Strength Fiber, E. S. Clark, and L. S. Scott, *October, p. 682*

The Role of Crystallite Dimensions in Mechanical and Diffusion Characteristics of Uniaxially Oriented Polymers, D. C. Prevorsek and R. K. Sharma, *November, p. 778*

58. Fillers

Short- and Long-Term Strength Characteristics of Particulate-Filled Cast Epoxy Resin, H. Hojo, W. Toyoshima, M. Tamura, and N. Kawamura, *September, p. 604*

59. Film

Polyvinyl Chloride Insoluble Gels: Their Structure and Effect on Properties of Cast Films, F. E. Filisko, *May, p. 352*

Strain History of the Melt in Film Blowing, R. Farber and J. Dealy, *June, p. 435*

Kinetics of Vapor and Liquid Transport in Glassy Polyblends of Polystyrene and Poly(2, 6-Dimethyl-1, 4-Phenylene Oxide) Part II, C. H. M. Jacques and H. B. Hopfenberg, *June, p. 449*

Flash Exposure System for Thin Photoresist Films, D. E. O'Hora and W. F. Beuschel, *July, p. 509*

The Interaction of 5 KeV Electrons with Polymers of Methyl Isopropenyl Ketone, A. W. Levine, M. Kaplan, and E. S. Poliniak, *July, p. 518*

Vapor Development of Poly (Olefin Sulfone) Resists, M. J. Bowden and L. F. Thompson, *July, p. 525*

Lithography and Radiation Chemistry of Epoxy Containing Negative Electron Resists, L. F. Thompson, E. D. Feit, and R. D. Heidenreich, *July, p. 529*

Factors Affecting the Sensitivity of E-Beam Resists, T. L. Brewer, *July, p. 534*

Variable Development Response of Resists Using Electron Beam Lithography: Methods and Applications, R. C. Henderson and R. F. W. Pease, *July, p. 538*

Plastic Deformation and Structure of Extruded Polymer Solids, A. Peterlin, *September, p. 627*

Glass Transitions of Topologically Interpenetrating Polymer Networks, H. L. Frisch, K. C. Frisch, and D. Klempner, *September, p. 646*

Characterization of Mechanical Properties of Thermoplastic Films by Creep Measurements, J. R. Huntsberger, *October, p. 702*

Viscosity and Shear Modulus of PVC-Plastisols During Gelation and Fusion, B. Cayrol, C. Klason, and J. Kubát, *December, p. 868*

60. Flexural Properties

Mechanical Properties of Impregnated Asbestos-Cement, P. Godard, P. Delvaux, M. Della Faille, and J. P. Mercier, *June, p. 429*

Short- and Long-Term Strength Characteristics of Particulate-Filled Cast Epoxy Resin, H. Hojo, W. Toyoshima, M. Tamura, and N. Kawamura, *September, p. 604*

The Reinforcement of Epoxy Resins With Potassium Titanate Whiskers, P. K. Mallick and L. J. Broutman, *September, p. 656*

61. Flow

Theoretical Model for Nonintermeshing Twin Screw Extruders, A. Kaplan and Z. Tadmor, *January, p. 58*

The Measurement of Melt Flow and Melt Stability, R. Longworth, *February, p. 98*

Dynamic Model of a Plasticating Extruder, Z. Tadmor, S. D. Lipshitz, and R. Lavie, *February, p. 112*

Rheological Analysis of Stabilizing Forces in Wire-Coating Dies, Z. Tadmor and R. B. Bird, *February, p. 124*

Key Indicators for Plastics Performance in Consumer Products, R. S. Hagan and J. R. Thomas, *March, p. 177*

Flow Visualization for Injection Molding of Polyethylene and Polystyrene Melts, J. L. White and H. B. Dee, *March, p. 212*

Prediction of Diallyl Phthalate Molding Performance from Laboratory Tests—I. Characterization and Quality Control of Diallyl Phthalate Compounds, R. Slysh, A. C. Hettinger, and K. E. Guyler, *April, p. 264*

Design of Extruder Dies Using Thermoplastics Melt Properties Data, P. C. Powell, *April, p. 298*

Melting of Crystallites in Polymers With Low Degree of Crystallinity Under Shear Flow Conditions. 1: Poly(vinyl chloride), J. Lyngaae-Jørgensen, *May, p. 342*

PVC Melt Rheology III: The Effect of Order and Molecular Weight on the Shear Rate Dependence, E. A. Collins and C. A. Daniels, *May, p. 357*

Liquid Flow Through Aligned Fiber Beds, J. G. Williams, C. E. M. Morris, and B. C. Ennis, *June, p. 413*

Pressure Generation Mechanisms in the Feed Section of Screw Extruders, J. G. A. Lovegrove and J. G. Williams, *August, p. 589*

Plastic Deformation and Structure of Extruded Polymer Solids, A. Peterlin, *September, p. 627*

An Approach for the Processing Engineer: Rheotechnics, A. Casale, A. Moroni, and I. Ronzoni, *September, p. 651*

Flow Analysis Network (FAN)—A Method for Solving Flow Problems in Polymer Processing, Z. Tadmor, E. Broyer, and C. Gutfinger, *September, p. 660*

Thermodynamics of Dissipative Materials with Entropic Elasticity, G. Astarita, *October, p. 730*

Viscometric Behavior of High-Density Polyethylene Solutions at High Temperatures, N. F. Brockmeier and S. P. Westphal, *November, p. 782*

A Special Mold and Tracer Technique for Studying Shear and Extensional Flows in a Mold Cavity During Injection Molding, L. R. Schmidt, *November, p. 797*

The Influence of Additives on the Flow Behavior of ABS, L. L. Blyler, Jr., *November, p. 806*

Segmented Polyether Ester Copolymers—A New Generation of High Performance Thermoplastic Elastomers, G. K. Hoeschele, *December, p. 848*

62. Foam

The Mechanical Properties of High-Density Rigid Polyurethane Foams in Compression: I. Modulus, P. J. Philips and N. R. Waterman, *January, p. 67*

The Mechanical Properties of High-Density Rigid Polyurethane Foams in Compression: II. Yield Behavior, N. R. Waterman and P. J. Phillips, *January, p. 72*

Structure and Properties of Flexible Vinyl Foams, R. D. Deanin, V. C. Kapasi, C. N. Georgacopoulos, and R. J. Picard, *March, p. 193*

A Hysteresis in Plasticized Poly (Vinyl Chloride), R. D. Deanin, S. B. Shah, V. C. Kapasi, D. H. Pfister, and P. Putriment, *May, p. 386*

Antioxidant-Associated Color Problems in Vinyl Foams, J. T. Renshaw and J. A. Cannon, *June, p. 473*

63. Folding

Why Do Polymer Molecules Fold? P. H. Lindenmeyer, *June, p. 456*

Crack Propagation in Polycarbonate, A. P. Glover, F. A. Johnson, and J. C. Radon, *June, p. 420*

64. Fracture

Elastic Fracture of Polystyrene Solutions, J. H. Southern and D. R. Paul, *August, p. 560*

Some Observations on the Morphology and Fracture Characteristics of Knit Lines, S. Y. Hobbs, *September, p. 621*

The Reinforcement of Epoxy Resins With Potassium Titanate Whiskers, P. K. Mallick and L. J. Broutman, *September, p. 656*

A Step Toward Molecular-Level Understanding of the Toughness of Glassy Plastics, A. C. Knight, *October, p. 687*

Nature of Fatigue Behavior and Effect of Flaw Size in Polystyrene, A. D. McMaster, D. R. Morrow, and J. A. Sauer, *November, p. 801*

65. Friction

Friction and Friction-Generated Temperature at a Polymer-Metal Interface, H. L. Price and H. D. Burks, *April, p. 288*

66. Fusion

The Influence of Stabilizers on the Fusion of Rigid Poly(Vinyl Chloride), F. R. Kulås and N. P. Thorshaug, *May, p. 366*

The Effect of Lubricants on the Fusion of Rigid Poly(Vinyl Chloride), J. E. Hartitz, *May, p. 392*

G

67. Gels

Polyvinyl Chloride Insoluble Gels: Their Structure and Effect on Properties of Cast Films, F. E. Filisko, *May, p. 352*

H

68. Holography

Computer Simulation Study of Images in Contact and Near-Contact Printing, B. J. Lin, *July, p. 498*

69. Hydrolysis

Photocrosslinkable Polyphosphonates Having Unusual Resistance to Acids, D. G. Borden, *July, p. 487*

70. Hysteresis

A Hysteresis in Plasticized Poly(Vinyl Chloride), R. D. Deanin, S. B. Shah, V. C. Kapasi, D. H. Pfister, and P. Putriment, *May, p. 386*

I

71. Impact Properties

Cold Rolling of Polymers—2. Toughness Enhancement in Amorphous Polycarbontes, L. J. Broutman and S. M. Krishnakumar, *April, p. 249*

Cold Rolling of Polymers: 4. Toughness Enhancement in Amorphous Polymers, L. J. Broutman and S. Krishnakumar, *December, p. 823*

Packing and Discharge in Injection Molding, Y. T. Koita, *December, p. 840*

72. Impregnation

Mechanical Properties of Impregnated Asbestos-Cement, P. Godard, P. Delvaux, M. Della Faille, and J. P. Mercier, *June, p. 429*

73. Injection Molding

Flow Visualization for Injection Molding of Polyethylene and Polystyrene Melts, J. L. White and H. B. Dee, *March, p. 212*

Simulation of the Mold-Filling Process, P.-C. Wu, C. F. Huang, and C. G. Gogos, *March, p. 223*

Thermoset Characterization for Moldability Analysis, M. R. Kamal, *March, p. 231*

A Melting Model for Reciprocating Screw Injection-Molding Machines, S. D. Lipshitz, R. Lavie, and Z. Tadmor, *August, p. 553*

A Design Approach to a Computer-Controlled Injection-Molding Machine, C. Y. W. Ma, *November, p. 768*

A Special Mold and Tracer Technique for Studying Shear and Extensional Flows in a Mold Cavity During Injection Molding, L. R. Schmidt, *November, p. 797*

Packing and Discharge in Injection Molding, Y. T. Koita, *December, p. 840*
Polymer-Glass Separation in the Spiral Mold Test, J. Kubát and A. Szalánczi, *December 873*

K

74. Ketones

The Interaction of 5 KeV Electrons with Polymers of Methyl Isopropenyl Ketone, A. W. Levine, M. Kaplan, and E. S. Poliniak, *July, p. 518*

75. Kinetic Properties

Thermoset Characterization for Moldability Analysis, M. R. Kamal, *March, p. 231*
Kinetics of Vapor and Liquid Transport in Glassy Polyblends of Polystyrene and Poly(2, 6-Dimethyl-1, 4-Phenylene Oxide) Part II, C. H. M. Jacques and H. B. Hopfenberg, *June, p. 449*
A Study of Chain Addition Polymerizations with Temperature Variations: 1. Thermal Drift and its Effect on Polymer Properties, J. A. Biesenberger and R. Capinpin, *November, p. 737*

L

76. Liquids

A Method for Estimating Both the Solubility Parameters and Molar Volumes of Liquids, R. F. Fedors, *February, p. 147*
Liquid Flow Through Aligned Fiber Beds, J. G. Williams, C. E. M. Morris, and B. C. Ennis, *June, p. 413*
A Method for Estimating Both the Solubility Parameters and Molar Volumes of Liquids. Supplement, R. F. Fedors, *June, p. 472*
Blade-Coating of a Viscoelastic Fluid, Y. Greener and S. Middleman, *November, p. 791*

77. Lubricants

The Effect of Lubricants on the Fusion of Rigid Poly(Vinyl Chloride), J. E. Hartitz, *May, p. 392*
The Significance of Capillary Rheology Testing Temperature for Predicting PVC Extrudability, P. L. Shah, *November, p. 773*

M

78. Machinery

Screw Horsepower Dependence on Screw Speed and Size—Theory and Experiment, C. I. Chung, R. J. Nichols, and G. A. Kruder, *January, p. 28*
Theoretical Model for Nonintermeshing Twin Screw Extruders, A. Kaplan and Z. Tadmor, *January, p. 58*
The Plasticating Process in Injection Molding, R. C. Donovan, *February, p. 101*
Packing and Discharge in Injection Molding, Y. T. Koita, *December, p 840*
Extruder Scale-Up by Computer, B. H. Maddock, *December, p. 853*

79. Mechanical Properties

Time-Temperature Superposition in Two-Phase Polyblends, D. Kaplan and N. W. Tschoegl, *January, p. 43*
The Mechanical Properties of High-Density Rigid Polyurethane Foams in Compression: I. Modulus, P. J. Phillips and N. R. Waterman, *January, p. 67*
The Mechanical Properties of High-Density Rigid Polyurethane Foams in Compression: II. Yield Behavior, N. R. Waterman and P. J. Phillips, *January, p. 72*
Cold Rolling of Polymers—3. Properties of Rolled Crystallized Polycarbonates, T. Kobayashi and L. J. Broutman, *April, p. 260*
Mechanical Properties of Impregnated Asbestos-Cement, P. Godard, P. Delvaux, M. Della Faille, and J. P. Mercier, *June, p. 429*
Analyses for Mechanical and Electrical Properties of Epoxy Resins Used as Potting Compounds, R. Fountain, *June, p. 478*
Short- and Long-Term Strength Characteristics of Particulate-Filled Cast Epoxy Resin, H. Hojo, W. Toyoshima, M. Tamura, and N. Kawamura, *September, p. 604*
The Mechanical Properties of Oriented Discontinuous Fiber-Reinforced Thermoplastics. 1. Unidirectional Fiber Orientation, B. F. Blumentritt, B. T. Vu, and S. L. Cooper, *September, p. 633*
Mechanical Properties of Certain Oriented Crystalline Polymers, H. W. Starkweather, Jr., T. F. Jordan, and G. B. Dunnington, *October, p. 678*
Characterization of Mechanical Properties of Thermoplastic Films by Creep Measurements, J. R. Huntsberger, *October, p. 702*
Heat Distortion and Mechanical Properties of Polymers by Thermal-Mechanical Analysis, A. T. Riga, *November, p. 764*
The Role of Crystallite Dimensions in Mechanical and Diffusion Characteristics of Uniaxially Oriented Polymers, D. C. Prevorsek and R. K. Sharma, *November, p. 778*
Segmented Polyether Ester Copolymers—A New Generation of High Performance Thermoplastic Elastomers, G. K. Hoeschele, *December, p. 848*

80. Mechanism

Mechanism of Refractive Index Increase in Photosensitized Poly(Methyl Methacrylate). M. J. Bowden, E. A. Chandross, and I. P. Kaminow, *July, p. 494*

81. Melt

The Plasticating Process in Injection Molding, R. C. Donovan, *February, p. 101*
Key Indicators for Plastics Performance in Consumer Products, R. S. Hagan and J. R. Thomas, *March, p. 177*
Flow Visualization for Injection Molding of Polyethylene and Polystyrene Melts, J. L. White and H. B. Dee, *March, p. 212*
Design of Extruder Dies Using Thermoplastics Melt Properties Data, P. C. Powell, *April, p. 298*
Melt Viscosity of Poly(Vinyl Chloride) Formulations, L. A. Utracki, *April, p. 308*
Melting of Crystallites in Polymers With Low Degree of Crystallinity Under Shear Flow Conditions. 1: Poly(vinyl chloride), J. Lyngaae-Jørgensen, *May, p. 342*
PVC Melt Rheology III: The Effect of Order and Molecular Weight on the Shear Rate Dependence, E. A. Collins and C. A. Daniels, *May, p. 357*
The Influence of Stabilizers on the Fusion of Rigid Poly(Vinyl Chloride), F. R. Kulas and N. P. Thorshaug, *May, p. 366*
Strain History of the Melt in Film Blowing, R. Farber and J. Dealy, *June, p. 435*
End Corrections in the Capillary Flow of Polystyrene Melts, K. S. Hyun, *September, p. 666*
Polymer-Glass Separation in the Spiral Mold Test, J. Kubát and A. Szalánczi, *December, p. 873*

82. Melt Stability

The Measurement of Melt Flow and Melt Stability, R. Longworth, *February, p. 98*

83. Membranes

The Electret Effect in Cellulose Acetate Reverse Osmosis Membranes, R. A. Wallace and R. J. Gable, *February, p. 92*
Polyvinyl Chloride Insoluble Gels: Their Structure and Effect on Properties of Cast Films, F. E. Filisko, *May, p. 352*
Transport Properties of Polyvinylpyridinium Anion-Exchange Membranes, R. A. Wallace and N. V. Vijayaraghavan, *September, p. 674*

84. Metals

Infrared Reflection Studies of Metal-Polymer Interfaces, M. G. Chan and D. L. Allara, *January, p. 12*
Mechanical Properties of Certain Oriented Crystalline Polymers, H. W. Starkweather, Jr., T. F. Jordan, and G. B. Dunnington, *October, p. 678*
Behavior of Zirconium Compounds in Polymers—A Review, W. B. Blumenthal, *November, p. 754*

85. Modulus

The Mechanical Properties of High-Density Rigid Polyurethane Foams in Compression: I. Modulus, P. J. Phillips and N. R. Waterman, *January, p. 67*

86. Moisture

Molding Polycarbonate: Moisture Degradation Effect on Physical and Chemical Properties, T. S. Long and R. J. Sokol, *December, p. 817*

87. Mold Filling

Simulation of the Mold-Filling Process, P.-C. Wu, C. F. Huang, and C. G. Gogos, *March, p. 223*

88. Molding

The Plasticating Process in Injection Molding, R. C. Donovan, *February, p. 101*
Prediction of Diallyl Phthalate Molding Performance from Laboratory Tests—I. Characterization and Quality Control of Diallyl Phthalate Compounds, R. Slysh, A. C. Hettinger, and K. E. Guyler, *April, p. 264*

Prediction of Diallyl Phthalate Molding Performance from Laboratory Tests—II. Comparison of Mechanical Spectrometer and Brabender Torque Rheometer, P. E. Willard, *April, p. 273*

Molding Polycarbonate: Moisture Degradation Effect on Physical and Chemical Properties, T. S. Long and R. J. Sokol, *December, p. 817*

89. Morphology

Morphology of a Polyurethane-Polyacrylate Interpenetrating Polymer Network, K. C. Frisch, D. Klempner, S. Migdal, H. L. Frisch, and H. Ghiradella, *January, p. 76*

The Solution of Plastics Prediction Problems by Thermoanalytical Techniques, H. E. Bair, *March, p. 202*

Polyvinyl Chloride Insoluble Gels: Their Structure and Effect on Properties of Cast Films, F. E. Filisko, *May, p. 352*

Processing-Morphology-Property Studies of Poly(Vinyl Chloride), C. Singleton, J. Isner, D. M. Gezovich, P. K. C. Tsou, P. H. Geil, and E. A. Collins, *May, p. 371*

Some Observations on the Morphology and Fracture Characteristics of Knit Lines, S. Y. Hobbs, *September, p. 621*

Superdrawn Crystalline Polymers: A New Class of High-Strength Fiber, E. S. Clark and L. S. Scott, *October, p. 682*

The Role of Crystallite Dimensions in Mechanical and Diffusion Characteristics of Uniaxially Oriented Polymers, D. C. Prevorsek and R. K. Sharma, *November, p. 778*

N

90. Networks

Glass Transitions of Topologically Interpenetrating Polymer Networks, H. L. Frisch, K. C. Frisch, and D. Klempner, *September, p. 646*

91. Nylon

Protein Structures and Protein Fibers—A Review, F. F. Huang and C. K. Rha, *February, p. 81*

Simulation of the Mold-Filling Process, P.-C. Wu, C. F. Huang, and C. G. Gogos, *March, p. 223*

Strain Recovery of Polyester and Nylon 66 Monofilaments Under Various Temperature Histories, A. C. Lunn, B-L. Lee, and I. V. Yannas, *September, p. 610*

Plastic Deformation and Structure of Extruded Polymer Solids, A. Peterlin, *September, p. 627*

Mechanical Properties of Certain Oriented Crystalline Polymers, H. W. Starkweather, Jr., T. F. Jordan, and G. B. Dunnington, *October, p. 678*

The Role of Crystallite Dimensions in Mechanical and Diffusion Characteristics of Uniaxially Oriented Polymers, D. C. Prevorsek and R. K. Sharma, *November, p. 778*

O

92. Orientation

Cold Rolling of Polymers—2. Toughness Enhancement in Amorphous Polycarbonates, L. J. Broutman and S. M. Krishnakumar, *April, p. 249*

93. Osmosis

The Electret Effect in Cellulose Acetate Reverse Osmosis Membranes, R. A. Wallace and R. J. Gable, *February, p. 92*

94. Oxidation

Infrared Reflection Studies of Metal-Polymer Interfaces, M. G. Chan and D. L. Allara, *January, p. 12*

The Weathering Degradation of Polyolefins, B. Baum, *March, p. 206*

P

95. Particle Size

Processing-Morphology-Property Studies of Poly(Vinyl Chloride), C. Singleton, J. Isner, D. M. Gezovich, P. K. C. Tsou, P. H. Geil, and E. A. Collins, *May, p. 371*

The Surface Area of Bulk Poly(vinyl chloride), R. Salovey, R. Cortellucci, and A. Roaldi, *February, p. 120*

Emulsion Polymerization of Vinyl Chloride: A New Method for Particle Size Analysis of Latexes of PVC and Applications, N. Fischer, *May, p. 332*

96. Phase Separation

Phase Behavior of Polybutene—1: Plus Polystyrene in Carbon Tetrachloride, B. H. Clampitt, *December, p. 827*

Polymer-Glass Separation in the Spiral Mold Test, J. Kubát and A. Szalánczi, *December, p. 873*

97. Phenolics

Thermoset Characterization for Moldability Analysis, M. R. Kamal, *March, p. 231*

Polymer Surface Reflectance-Absorptance Characteristics, J. R. Hallman, J. R. Welker, and C. M. Sliepcevich, *October, p. 717*

98. Phenoxy

Prediction of Melt Elasticity From Viscosity Data, S. I. Abdel-Khalik, O. Hassager, and R. B. Bird, *December, p. 859*

99. Photochemistry

Photochemistry in the Solid Phase, J. E. Guillet, *July, p. 482*

100. Photolithography

Azide Photoresists for Projection Photolithography, N. J. Clecak, R. J. Cox, and W. M. Moreau, *July, p. 491*

Computer Simulation Study of Images in Contact and Near-Contact Printing, B. J. Lin, *July, p. 498*

Flash Exposure System for Thin Photoresist Films, D. E. O'Hora and W. F. Beuschel, *July, p. 509*

The Interaction of 5 KeV Electrons with Polymers of Methyl Isopropenyl Ketone, A. W. Levine, M. Kaplan, and E. S. Poliniak, *July, p. 518*

Vapor Development of Poly (Olefin Sulfone) Resists, M. J. Bowden and L. F. Thompson, *July, p. 525*

Lithography and Radiation Chemistry of Epoxy Containing Negative Electron Resists, L. F. Thompson, E. D. Feit, and R. D. Heidenreich, *July, p. 529*

Variable Development Response of Resists Using Electron Beam Lithography: Methods and Applications, R. C. Henderson and R. F. W. Pease, *July, p. 538*

101. Photolysis

Photochemistry in the Solid Phase, J. E. Guillet, *July, p. 482*

102. Photopolymers

Epoxy Photopolymers in Photoimaging and Photofabrication, S. I. Schlesinger, *July, p. 513*

103. Photopolymerization

Epoxy Photopolymers in Photoimaging and Photofabrication, S. I. Schlesinger, *July, p. 513*

104. Photoresists

Azide Photoresists for Projection Photolithography, N. J. Clecak, R. J. Cox, and W. M. Moreau, *July, p. 491*

Flash Exposure System for Thin Photoresist Films, D. E. O'Hora and W. F. Beuschel, *July, p. 509*

105. Physical Properties

The Plasticating Process in Injection Molding, R. C. Donovan, *February, p. 101*

Structure and Properties of Flexible Vinyl Foams, R. D. Deanin, V. C. Kapasi, C. N. Georgacopoulos, and R. J. Picard, *March, p. 193*

Polyvinyl Chloride Insoluble Gels: Their Structure and Effect on Properties of Cast Films, F. E. Filisko, *May, p. 352*

Crack Propagation in Polycarbonate, A. P. Glover, F. A. Johnson, and J. C. Radon, *June, p. 420*

Lithography and Radiation Chemistry of Epoxy Containing Negative Electron Resists, L. F. Thompson, E. D. Feit, and R. D. Heidenreich, *July, p. 529*

A Study of Chain Addition Polymerizations with Temperature Variations: 1. Thermal Drift and its Effect on Polymer Properties, J. A. Biesenberger and R. Capinpin, *November, p. 737*

Behavior of Zirconium Compounds in Polymers—A Review, W. B. Blumenthal, *November, p. 754*

Thermoforming Conditions in Transparent/Opaque Coextruded Sheet, R. C. Progelhof and J. L. Throne, *November, p. 810*

Molding Polycarbonate: Moisture Degradation Effect on Physical and Chemical Properties, T. S. Long and R. J. Sokol, *December, p. 817*

Phase Behavior of Polybutene-1 Plus Polystyrene in Carbon Tetrachloride, B. H. Clampitt, *December, p. 827*

Segmented Polyether Ester Copolymers—A New Generation of High Performance Thermoplastic Elastomers, G. K. Hoeschele, *December, p. 848*

106. Plasticizers

Key Indicators for Plastics Performance in Consumer Products, R. S. Hagan and J. R. Thomas, *March, p. 177*

Structure and Properties of Flexible Vinyl Foams, R. D. Deanin, V. C. Kapasi, C. N. Georgacopoulos, and R. J. Picard, *March, p. 193*

Melt Viscosity of Poly(Vinyl Chloride) Formulations, L. A. Utracki, *April, p. 308*

Processing-Morphology-Property Studies of Poly(Vinyl Chloride), C. Singleton, J. Isner, D. M. Gezovich, P. K. C. Tsou, P. H. Geil and E. A. Collins, *May, p. 371*

High-Frequency Alpha Transition Response of Some Plasticized Poly(Vinyl Chloride) Compositions, G. W. Paddison, *May, p. 382*

A Hysteresis in Plasticized Poly(Vinyl Chloride), R. D. Deanin, S. B. Shah, V. C. Kapasi, D. H. Pfister, and P. Putriment, *May, p. 386*

Antioxidant-Associated Color Problems in Vinyl Foams, J. T. Renshaw and J. A. Cannon, *June, p. 473*

Characterization of Mechanical Properties of Thermoplastic Films by Creep Measurements, J. R. Huntsberger, *October, p. 702*

107. Plastics

Key Indicators for Plastics Performance in Consumer Products, R. S. Hagan and J. R. Thomas, *March, p. 177*

108. Polyacrylamide

A Rheological Study of Aqueous Separan Solutions, R. F. Blanks, H. C. Park, D. R. Patel, and M. C. Hawley, *January, p. 16*

Prediction of Melt Elasticity From Viscosity Data, S. I. Abdel-Khalik, O. Hassager, and R. B. Bird, *December, p. 859*

109. Polyacrylate

Morphology of a Polyurethane-Polyacrylate Interpenetrating Polymer Network, K. C. Frisch, D. Klempner, S. Migdal, H. L. Frisch, and H. Ghiradella, *January, p. 76*

110. Polyblends

The Solution of Plastics Prediction Problems by Thermoanalytical Techniques, H. E. Bair, *March, p. 202*

Vapor and Liquid Equilibria in Glassy Polyblends of Polystyrene and Poly (2, 6-Dimethyl-1, 4-Phenylene Oxide) Part I, C. H. M. Jacques and H. B. Hopfenberg, *June, p. 441*

Kinetics of Vapor and Liquid Transport in Glassy Polyblends of Polystyrene and Poly(2, 6-Dimethyl-1, 4-Phenylene Oxide) Part II, C. H. M. Jacques and H. B. Hopfenberg, *June, p. 449*

A Dynamical Theory of Elastic Micro-Dielectric Polymers, M. Shahinpoor and H. Kalhor, *June, p. 464*

Polymer-Glass Separation in the Spiral Mold Test, J. Kubát and A. Szalánczi, *December, p. 873*

111. Polybutadiene

Free Radical Formation in Oriented Polybutadiene During Mechanical Deformation Below T_g, W. T. Mead and P. E. Reed, *January, p. 22*

The Solution of Plastics Prediction Problems by Thermoanalytical Techniques, H. E. Bair, *March, p. 202*

112. Polybutene-1

Phase Behavior of Polybutene-1 Plus Polystyrene in Carbon Tetrachloride, B. H. Clampitt, *December, p. 827*

113. Polybutylene Terephthalate

A Special Mold and Tracer Technique for Studying Shear and Extensional Flows in a Mold Cavity During Injection Molding, L. R. Schmidt, *November, p. 797*

114. Polycarbonate

Prediction and Evaluation of the Susceptibilities of Glassy Thermoplastics to Environmental Stress Cracking, L. F. Henry, *March, p. 167*

Key Indicators for Plastics Performance in Consumer Products, R. S. Hagan and J. R. Thomas, *March, p. 177*

Cold Rolling of Polymers—2. Toughness Enhancement in Amorphous Polycarbonates, L. J. Broutman and S. M. Krishnakumar, *April, p. 249*

Cold Rolling of Polymers—3. Properties of Rolled Crystallized Polycarbonates, T. Kobayashi and L. J. Broutman, *April, p. 260*

Crack Propagation in Polycarbonate, A. P. Glover, F. A. Johnson, and J. C. Radon, *June, p. 420*

A Step Toward Molecular-Level Understanding of the Toughness of Glassy Plastics, A. C. Knight, *October, p. 687*

The Effect of Sudden Strain-Rate Change on the Yield Behavior of Bisphenol-A Polycarbonate, A. F. Yee and P. B. Detorres, *October, p. 691*

Dilatometric Studies of Polymers Undergoing High and Low Rate Tensile Deformation, L. C. Cessna, *October, p. 696*

Molding Polycarbonate: Moisture Degradation Effect on Physical and Chemical Properties, T. S. Long and R. J. Sokol, *December, p. 817*

115. Polyesters

Chemical Thickening of Low Profile Polyester Resin Systems, F. R. Volgstadt and C. L. Sieglaff, *February, p. 143*

Strain Recovery of Polyester and Nylon 66 Monofilaments Under Various Temperature Histories, A. C. Lunn, B-L. Lee, and I. V. Yannas, *September, p. 610*

116. Polyethers

Segmented Polyether Ester Copolymers—A New Generation of High Performance Thermoplastic Elastomers, G. K. Hoeschele, *December, p. 848*

117. Polyethylene

Infrared Reflection Studies of Metal-Polymer Interfaces, M. G. Chan and D. L. Allara, *January, p. 12*

Screw Horsepower Dependence on Screw Speed and Size—Theory and Experiment. C. I. Chung, R. J. Nichols, and G. A. Kruder, *January, p. 28*

The Plasticating Process in Injection Molding, R. C. Donovan, *February, p. 101*

Structural Relationship Between Thermomechanical History and Strength of Polymeric Solids, S. Matsuoka, *March, p. 162*

The Weathering Degradation of Polyolefins, B. Baum, *March, p. 206*

Flow Visualization for Injection Molding of Polyethylene and Polystyrene Melts, J. L. White and H. B. Dee, *March, p. 212*

Simulation of the Mold-Filling Process, P.-C. Wu, C. F. Huang, and C. G. Gogos, *March, p. 223*

Melting of Crystallites in Polymers with Low Degree of Crystallinity Under Shear Flow Conditions 1: Poly(vinyl chloride), J. Lyngaae-Jørgensen, *May, p. 342*

Strain History of the Melt in Film Blowing, R. Farber and J. Dealy, *June, p. 435*

16-Year Creep of Polyethylene and PVC, W. N. Findley and J. F. Tracy, *August, p. 577*

The Anisotropy of Creep Behavior in Oriented Thermoplastics, M. W. Darlington and D. W. Saunders, *September, p. 616*

Plastic Deformation and Structure of Extruded Polymer Solids, A. Peterlin, *September, p. 627*

Hydrostatic Extrusion of Solid Polyethylene, L. A. Davis, *September, p. 641*

Mechanical Properties of Certain Oriented Crystalline Polymers, H. W. Starkweather, Jr., T. F. Jordan, and G. B. Dunnington, *October, p. 678*

Dilatometric Studies of Polymers Undergoing High and Low Rate Tensile Deformation, L. C. Cessna, *October, p. 696*

Stability of Polymer Composites as Positive-Temperature-Coefficient Resistors, J. Meyer, *October, p. 706*

Viscometric Behavior of High-Density Polyethylene Solutions at High Temperatures, N. F. Brockmeier and S. P. Westphal, *November, p. 782*

Prediction of Melt Elasticity From Viscosity Data, S. I. Abdel-Khalik, O. Hassager, and R. B. Bird, *December, p. 859*

118. Polyethylene Oxide

Crystallization of Polyethylene Oxide Under Shear, A. K. Fritzsche and F. P. Price, *June, p. 401*

Polymer-Glass Separation in the Spiral Mold Test, J. Kubát and A. Szalánczi, *December, p. 873*

119. Polyimide

Friction and Friction-Generated Temperature at a Polymer-Metal Interface, H. L. Price and H. D. Burks, *April, p. 288*

120. Polyisobutylene

Prediction of Melt Elasticity From Viscosity Data, S. I. Abdel-Khalik, O. Hassager, and R. B. Bird, *December, p. 859*

121. Polymerization

The SPE International Award Address—1973: The Development of Impact Polystyrene—A Review, J. L. Amos, *January, p. 1*

Emulsion Polymerization of Vinyl Chloride: A New Method for Particle Size Analysis of Latexes of PVC and Applications, N. Fischer, *May, p. 332*

Suspension Polymerization of Vinyl Chloride in the Presence of Propane, A. Michel and A. Guyot, *May, p. 338*

Photocrosslinkable Polyphosphonates Having Unusual Resistance to Acids, D. G. Borden, *July, p. 487*
Mechanism of Refractive Index Increase in Photosensitized Poly(Methyl Methacrylate), M. J. Bowden, E. A. Chandross, and I. P. Kaminow, *July, p. 494*
A Study of Chain Addition Polymerizations with Temperature Variations: 1. Thermal Drift and its Effect on Polymer Properties, J. A. Biesenberger and R. Capinpin, *November, p. 737*

122. Polymers

A Method for Estimating Both the Solubility Parameters and Molar Volumes of Liquids, R. F. Fedors, *February, p. 147*
Why Do Polymer Molecules Fold? P. H. Lindenmeyer, *June, p. 456*
Photochemistry in the Solid Phase, J. E. Guillet, *July, p. 482*
Polymer Surface Reflectance-Absorptance Characteristics, J. R. Hallman, J. R. Welker, and C. M. Sliepcevich, *October, p. 717*
Heat Distortion and Mechanical Properties of Polymers by Thermal-Mechanical Analysis, A. T. Riga, *November, p. 764*

123. Polymethylmethacrylate

Time-Temperature Superposition in Two-Phase Polyblends, D. Kaplan and N. W. Tschoegl, *January, p. 43*
Polymerization of Methyl Methacrylate with Ziegler-Natta Catalysts, S. L. Kapur and A. B. Deshpande, *April, p. 276*
Mechanism of Refractive Index Increase in Photosensitized Poly(Methyl Methacrylate), M. J. Bowden, E. A. Chandross, and I. P. Kaminow, *July, p. 494*
Factors Affecting the Sensitivity of E-Beam Resists, T. L. Brewer, *July, p. 534*
Variable Development Response of Resists Using Electron Beam Lithography: Methods and Applications, R. C. Henderson and R. F. W. Pease, *July, p. 538*
The Anisotropy of Creep Behavior in Oriented Thermoplastics, M. W. Darlington and D. W. Saunders, *September, p. 616*
A Step Toward Molecular-Level Understanding of the Toughness of Glassy Plastics, A. C. Knight, *October, p. 687*
Characterization of Mechanical Properties of Thermoplastic Films by Creep Measurements, J. R. Huntsberger, *October, p. 702*
Thermoforming Conditions in Transparent/Opaque Coextruded Sheet, R. C. Progelhof and J. L. Throne, *November, p. 810*

124. Polyolefins

Infrared Reflection Studies of Metal-Polymer Interfaces, M. G. Chan and D. L. Allara, *January, p. 12*
The Weathering Degradation of Polyolefins, B. Baum, *March, p. 206*
Design of Extruder Dies Using Thermoplastics Melt Properties Data, P. C. Powell, *April, p. 298*
Vapor Development of Poly(Olefin Sulfone) Resists, M. J. Bowden and L. F. Thompson, *July, p. 525*
A Comparison Between Simple Shear, Elongation, and Equal Biaxial Extension Deformations, F. N. Cogswell and D. R. Moore, *August, p. 573*

125. Polyoxymethylene

Mechanical Properties of Certain Oriented Crystalline Polymers, H. W. Starkweather, Jr., T. F. Jordan, and G. B. Dunnington, *October, p. 678*

126. Polyphenylene Oxide

Vapor and Liquid Equilibria in Glassy Polyblends of Polystyrene and Poly(2, 6-Dimethyl-1, 4-Phenylene Oxide) Part I, C. H. M. Jacques and H. B. Hopfenberg, *June, p. 441*
Kinetics of Vapor and Liquid Transport in Glassy Polyblends of Polystyrene and Poly (2, 6-Dimethyl-1, 4-Phenylene Oxide) Part II, C. H. M. Jacques and H. B. Hopfenberg, *June, p. 449*
Cold Rolling of Polymers: 4. Toughness Enhancement in Amorphous Polymers, L. J. Broutman and S. Krishnakumar, *December, p. 823*

127. Polyphosphonates

Photocrosslinkable Polyphosphonates Having Unusual Resistance to Acids, D. G. Borden, *July, p. 487*

128. Polypropylene

Key Indicators for Plastics Performance in Consumer Products, R. S. Hagan and J. R. Thomas, *March, p. 177*
Rapid Flexural Creep and Engineering Analysis for Product Design of a Propylene Copolymer, C. J. Aloisio, Jr., and R. R. Cammons, *March, p. 189*
The Weathering Degradation of Polyolefins, B. Baum, *March, p. 206*
Some Observations on the Morphology and Fracture Characteristics of Knit Lines, S. Y. Hobbs, *September, p. 621*
Mechanical Properties of Certain Oriented Crystalline Polymers, H. W. Starkweather, Jr.. T. F. Jordan, and G. B. Dunnington, *October, p. 678*
Dilatometric Studies of Polymers Undergoing High and Low Rate Tensile Deformation, L. C. Cessna, *October, p. 696*

129. Polysiloxanes

Linear Polycarboranesiloxanes, M. B. Roller and J. K. Gillham, *August, p. 567*

130. Polystyrene

The SPE International Award Address—1973: The Development of Impact Polystyrene—A Review, J. L. Amos, *January, p. 1*
Screw Horsepower Dependence on Screw Speed and Size—Theory and Experiment, C. I. Chung, R. J. Nichols, and G. A. Kruder, *January, p. 28*
Key Indicators for Plastics Performance in Consumer Products, R. S. Hagan and J. R. Thomas, *March, p. 177*
Flow Visualization for Injection Molding of Polyethylene and Polystyrene Melts, J. L. White and H. B. Dee, *March, p. 212*
Simulation of the Mold-Filling Process, P.-C. Wu, C. F. Huang, and C. G. Gogos, *March, p. 223*
Tensile Crazing and Shear Banding of Styrene A: Temperature and Rate Effects, J. N. Sultan and F. J. McGarry, *April, p. 282*
Vapor and Liquid Equilibria in Glassy Polyblends of Polystyrene and Poly (2, 6-Dimethyl-1, 4-Phenylene Oxide) Part I, C. H. M. Jacques and H. B. Hopfenberg, *June, p. 441*
Kinetics of Vapor and Liquid Transport in Glassy Polyblends of Polystyrene and Poly(2, 6-Dimethyl-1, 4-Phenylene Oxide) Part II, C. H. M. Jacques and H. B. Hopfenberg, *June, p. 449*
Elastic Fracture of Polystyrene Solutions, J. H. Southern and D. R. Paul, *August, p. 560*
End Corrections in the Capillary Flow of Polystyrene Melts, K. S. Hyun, *September, p. 666*
A Step Toward Molecular-Level Understanding of the Toughness of Glassy Plastics, A. C. Knight, *October, p. 687*
Dilatometric Studies of Polymers Undergoing High and Low Rate Tensile Deformation, L. C. Cessna, *October, p. 696*
Nature of Fatigue Behavior and Effect of Flaw Size in Polystyrene, A. D. McMaster, D. R. Morrow, and J. A. Sauer, *November, p. 801*
Phase Behavior of Polybutene-1 Plus Polystyrene in Carbon Tetrachloride, B. H. Clampitt, *December, p. 827*
Prediction of Melt Elasticity From Viscosity Data, S. I. Abdel-Khalik, O. Hassager, and R. B. Bird, *December, p. 859*

131. Polysulfone

Prediction and Evaluation of the Susceptibilities of Glassy Thermoplastics to Environmental Stress Cracking, L. F. Henry, *March, p. 167*
A Step Toward Molecular-Level Understanding of the Toughness of Glassy Plastics, A. C. Knight, *October, p. 687*
Cold Rolling of Polymers: 4. Toughness Enhancement in Amorphous Polymers, L. J. Broutman and S. Krishnakumar, *December, p. 823*

132. Polyurethane

The Mechanical Properties of High-Density Rigid Polyurethane Foams in Compression: I. Modulus, P. J. Phillips and N. R. Waterman, *January, p. 67*
The Mechanical Properties of High-Density Rigid Polyurethane Foams in Compression: II. Yield Behavior, N. R. Waterman and P. J. Phillips, *January, p. 72*
Morphology of a Polyurethane-Polyacrylate Interpenetrating Polymer Network, K. C. Frisch, D. Klempner, S. Migdal, H. L. Frisch, and H. Ghiradella, *January, p. 76*
Thermal Expansion Instability and Effect on Creep of a Highly Crosslinked Polyurethane, W. N. Findley and R. M. Reed, *October, p. 724*

133. Polyvinyl Acetate

Time-Temperature Superposition in Two-Phase Polyblends, D. Kaplan and N. W. Tschoegl, *January, p. 43*

134. Polyvinyl Chloride

The Plasticating Process in Injection Molding, R. C. Donovan, *February, p. 101*

The Surface Area of Bulk Poly(vinyl chloride), R. Salovey, R. Cortellucci, and A. Roaldi, *February, p. 120*
Structure and Properties of Flexible Vinyl Foams, R. D. Deanin, V. C. Kapasi, C. N. Georgacopoulos, and R. J. Picard, *March, p. 193*
Simulation of the Mold-Filling Process, P.-C. Wu, C. F. Huang, and C. G. Gogos, *March, p. 223*
Melt Viscosity of Poly(Vinyl Chloride) Formulations, L. A. Utracki, *April, p. 308*
The Concentration and Possible Source of Unstable Sites in PVC, A. R. Berens, *May, p. 318*
Phenylation of PVC With Triphenylaluminum and Related Model Reactions, J. P. Kennedy and M. Ichikawa, *May, p. 322*
Emulsion Polymerization of Vinyl Chloride: A New Method for Particle Size Analysis of Latexes of PVC and Applications, N. Fischer, *May, p. 332*
Suspension Polymerization of Vinyl Chloride in the Presence of Propane, A. Michel and A. Guyot, *May, p. 338*
Melting of Crystallites in Polymers With Low Degree of Crystallinity Under Shear Flow Conditions. 1: Poly(vinyl chlodide), J. Lyngaae-Jørgensen, *May, p. 342*
Polyvinyl Chloride Insoluble Gels: Their Structure and Effect on Properties of Cast Films, F. E. Filisko, *May, p. 352*
PVC Melt Rheology III: The Effect of Order and Molecular Weight on the Shear Rate Dependence, E. A. Collins and C. A. Daniels, *May, p. 357*
The Influence of Crystallinity on the Beta-Transition in Poly(Vinyl Chloride), E. R. Harrell, Jr. and R. P. Chartoff, *May, p. 362*
The Influence of Stabilizers on the Fusion of Rigid Poly(Vinyl Chloride), F. R. Kulas and N. P. Thorshaug, *May, p. 366*
Processing-Morphology-Property Studies of Poly(Vinyl Chloride), C. Singleton, J. Isner, D. M. Gezovich, P. K. C. Tsou, P. H. Geil, and E. A. Collins, *May, p. 371*
High-Frequency Alpha Transition Response of Some Plasticized Poly(Vinyl Chloride) Compositions, G. W. Paddison, *May, p. 382*
A Hysteresis in Plasticized Poly(Vinyl Chloride), R. D. Deanin, S. B. Shah, V. C. Kapasi, D. H. Pfister, and P. Putriment, *May, p. 386*
Characterization of Vinyl Chloride-Propylene Copolymers, R. K. S. Chan and C. H. Worman, *May, p. 389*
The Effect of Lubricants on the Fusion of Rigid Poly(Vinyl Chloride), J. E. Hartitz, *May, p. 392*
16-Year Creep of Polyethylene and PVC, W. N. Findley and J. F. Tracy, *August, p. 577*
The Anisotropy of Creep Behavior in Oriented Thermoplastics, M. W. Darlington and D. W. Saunders, *September, p. 616*
Mechanical Properties of Certain Oriented Crystalline Polymers. H. W. Starkweather, Jr., T. F. Jordan, and G. B. Dunnington, *October, p. 678*
Polymer Surface Reflectance-Absorptance Characteristics, J. R. Hallman, J. R. Welker, and C. M. Sliepcevich, *October, p. 717*
The Significance of Capillary Rheology Testing Temperature for Predicting PVC Extrudability, P. L. Shah, *November, p. 773*
Cold Rolling of Polymers: 4. Toughness Enhancement in Amorphous Polymers, L. J. Broutman and S. Krishnakumar, *December, p. 823*
Effects of a Fluid Environment on the Stiffness of Polymers, D. McCammond and C. A. Ward, *December, p. 831*
Packing and Discharge in Injection Molding, Y. T. Koita, *December, p. 840*
Viscosity and Shear Modulus of PVC-Plastisols During Gelation and Fusion, B. Cayrol, C. Klason, and J. Kubát, *December, p. 868*

135. Pressure Dependence

The Plasticating Process in Injection Molding, R. C. Donovan, *February, p. 101*
Dynamic Model of a Plasticating Extruder, Z. Tadmor, S. D. Lipshitz, and R. Lavie, *February, p. 112*
Thermoset Characterization for Moldability Analysis, M. R. Kamal, *March, p. 231*
Suspension Polymerization of Vinyl Chloride in the Presence of Propane, A. Michel and A. Guyot, *May, p. 338*
Liquid Flow Through Aligned Fiber Beds, J. G. Williams, C. E. M. Morris, and B. C. Ennis, *June, p. 413*
Pressure Generation Mechanisms in the Feed Section of Screw Extruders, J. G. A. Lovegrove and J. G. Williams, *August, p. 589*
Blade-Coating of a Viscoelastic Fluid, Y. Greener and S. Middleman, *November, p. 791*

136. Processing

The SPE International Award Address—1973: The Development of Impact Polystyrene—A Review, J. L. Amos, *January, p. 1*
Protein Structures and Protein Fibers—A Review, F. F. Huang and C. K. Rha, *February, p. 81*
The Plasticating Process in Injection Molding, R. C. Donovan, *February, p. 101*
Key Indicators for Plastics Performance in Consumer Products, R. S. Hagan and J. R. Thomas, *March, p. 177*
The Processing and Aging of Boron/Epoxy Composite Materials, J. F. Jones, T. T. Bartels, and R. Fountain, *March, p. 240*
Processing-Morphology-Property Studies of Poly(Vinyl Chloride), C. Singleton, J. Isner, D. M. Gezovich, P. K. C. Tsou, P. H. Geil, and E. A. Collins, *May, p. 371*
Hydrostatic Extrusion of Solid Polyethylene, L. A. Davis, *September, p. 641*
An Approach for the Processing Engineer: Rheotechnics, A. Casale, A. Moroni, and I. Ronzoni, *September, p. 651*
Flow Analysis Network (FAN)—A Method for Solving Flow Problems in Polymer Processing, Z. Tadmor, E. Broyer, and C. Gutfinger, *September, p. 660*
The Influence of Additives on the Flow Behavior of ABS, L. L. Blyler, Jr., *November, p. 806*
Thermoforming Conditions in Transparent/Opaque Coextruded Sheet, R. C. Progelhof and J. L. Throne, *November, p. 810*
Segmented Polyether Ester Copolymers—A New Generation of High Performance Thermoplastic Elastomers, G. K. Hoeschele, *December, p. 848*

137. Propane

Suspension Polymerization of Vinyl Chloride in the Presence of Propane, A. Michel and A. Guyot, *May, p. 338*

138. Proteins

Protein Structures and Protein Fibers—A Review, F. F. Huang and C. K. Rha, *February, p. 81*

139. Pyrrone

Friction and Friction-Generated Temperature at a Polymer-Metal Interface, H. L. Price and H. D. Burks, *April, p. 288*

R

140. Radiation

Infrared Reflection Studies of Metal-Polymer Interfaces, M. G. Chan and D. L. Allara, *January, p. 12*
Polymerization of Methyl Methacrylate and Ziegler-Natta Catalysts, S. L. Kapur and A. B. Deshpande, *April, p. 276*
Mechanism of Refractive Index Increase in Photosensitized Poly(Methyl Methacrylate), M. J. Bowden, E. A. Chandross, and I. P. Kaminow, *July, p. 494*
Polymer Surface Reflectance-Absorptance Characteristics, J. R. Hallman, J. R. Welker, and C. M. Sliepcevich, *October, p. 717*
Predicting Radiant Energy Transmission Through Polymer Sheets, R. C. Progelhof and J. L. Throne, *November, p. 760*

141. Reactivity

Prediction of Diallyl Phthalate Molding Performance from Laboratory Tests—II. Comparison of Mechanical Spectrometer and Brabender Torque Rheometer, P. E. Willard, *April, p. 273*

142. Reflectance

Polymer Surface Reflectance-Absorptance Characteristics, J. R. Hallman, J. R. Welker, and C. M. Sliepcevich, *October, p. 717*
Predicting Radiant Energy Transmission Through Polymer Sheets, R. C. Progelhof and J. L. Throne, *November, p. 760*

143. Refractive Index

Mechanism of Refractive Index Increase in Photosensitized Poly(Methyl Methacrylate), M. J. Bowden, E. A. Chandross, and I. P. Kaminow, *July, p. 494*

144. Reinforced Plastics

Chemical Thickening of Low Profile Polyester Resin Systems, F. R. Volgstadt and C. L. Sieglaff, *February, p. 143*
Prediction of Diallyl Phthalate Molding Performance from Laboratory Tests—I. Characterization and Quality Control of Diallyl Phthalate Compounds, R. Slysh, A. C. Hettinger, and K. E. Guyler, *April, p. 264*

145. Rheology

A Rheological Study of Aqueous Separan Solutions, R. F. Blanks, H. C. Park, D. R. Patel, and M. C. Hawley, *January, p. 16*

Time-Temperature Superposition in Two-Phase Polyblends, D. Kaplan and N. W. Tschoegl, *January, p. 43*

Time-Temperature Superpositioning of Viscosity-Time Profiles of Three High Temperature Epoxy Resins, R. P. White, Jr., *January, p. 50*

Rheological Analysis of Stabilizing Forces in Wire-Coating Dies, Z. Tadmor and R. B. Bird, *February, p. 124*

Chemical Thickening of Low Profile Polyester Resin Systems, F. R. Volgstadt and C. L. Sieglaff, *February, p. 143*

Flow Visualization for Injection Molding of Polyethylene and Polystyrene Melts, J. L. White and H. B. Dee, *March, p. 212*

Thermoset Characterization for Moldability Analysis, M. R. Kamal, *March, p. 231*

A Sliding Scale Method for Rapid Interpretation of Rheological Measurements, A. Ziabicki and G. Szenberg, *April, p. 292*

Emulsion Polymerization of Vinyl Chloride: A New Method for Particle Size Analysis of Latexes of PVC and Applications, N. Fischer, *May, p. 332*

PVC Melt Rheology III: The Effect of Order and Molecular Weight on the Shear Rate Dependence, E. A. Collins and C. A. Daniels, *May, p. 357*

Processing-Morphology-Property Studies of Poly(Vinyl Chloride), C. Singleton, J. Isner, D. M. Gezovich, P. K. C. Tsou, P. H. Geil, and E. A. Collins, *May, p. 371*

Elastic Fracture of Polystyrene Solutions, J. H. Southern and D. R. Paul, *August, p. 560*

A Comparison Between Simple Shear, Elongation, and Equal Biaxial Extension Deformations, F. N. Cogswell and D. R. Moore, *August, p. 573*

An Approach for the Processing Engineer: Rheotechnics, A. Casale, A. Moroni, and I. Ronzoni, *September, p. 651*

The Significance of Capillary Rheology Testing Temperature for Predicting PVC Extrudability, P. L. Shah, *November, p. 773*

The Influence of Additives on the Flow Behavior of ABS, L. L. Blyler, Jr., *November, p. 806*

146. Rheometry

Capillary Rheometry of Raw Elastomers, Butadiene-Acrylonitrile Copolymers, N. Nakajima and E. A. Collins, *February, p. 137*

A Sliding Scale Method for Rapid Interpretation of Rheological Measurements, A. Ziabicki and G. Szenberg, *April, p. 292*

Viscosity and Shear Modulus of PVC-Plastisols During Gelation and Fusion, B. Cayrol, C. Klason, and J. Kubát, *December, p. 868*

147. Rheotechnics

An Approach for the Processing Engineer: Rheotechnics, A. Casale, A. Moroni, and I. Ronzoni, *September, p. 651*

148. Rubbers

A New Thickness Sensor Based on the Hall Effect, M. Okuyama, K. Yagii, S. C. Sharda, and N. W. Tschoegl, *January, p. 38*

Free Radical Formation in Oriented Polybutadiene During Mechanical Deformation Below T_g, W. T. Mead and P. E. Reed, *January, p. 22*

Stress-strain Behavior of Polychloroprene Vulcanizates Containing Polymer-gel Particles, N. Kawasaki, *February, p. 155*

Tensile Crazing and Shear Banding of Styrene A: Temperature and Rate Effects, J. N. Sultan and F. J. McGarry, *April, p. 282*

Azide Photoresists for Projection Photolithography, N. J. Clecak, R. J. Cox, and W. M. Moreau, *July, p. 491*

Dilatometric Studies of Polymers Undergoing High and Low Rate Tensile Deformation, L. C. Cessna, *October, p. 696*

Polymer Surface Reflectance-Absorptance Characteristics, J. R. Hallman, J. R. Welker, and C. M. Sliepcevich, *October, p. 717*

S

149. Sensitivity

Factors Affecting the Sensitivity of E. Beam Resists, T. L. Brewer, *July, p. 534*

150. Sensors

A New Thickness Sensor Based on the Hall Effect, M. Okuyama, K. Yagii, S. C. Sharda, and N. W. Tschoegl, *January, p. 38*

151. Shear

A Rheological Study of Aqueous Separan Solutions, R. F. Blanks, H. C. Park, D. R. Patel, and M. C. Hawley, *January, p. 16*

Time-Temperature Superpositioning of Viscosity-Time Profiles of Three High Temperature Epoxy Resins, R. P. White, Jr., *January, p. 50*

Protein Structures and Protein Fibers—A Review, F. F. Huang and C. K. Rha, *February, p. 81*

The Measurement of Melt Flow and Melt Stability, R. Longworth, *February, p. 88*

Capillary Rheometry of Raw Elastomers, Butadiene-Acrlonitrile Copolymers, N. Nakajima and E. A. Collins, *February, p. 137*

Chemical Thickening of Low Profile Polyester Resin Systems, F. R. Volgstadt and C. L. Sieglaff, *February, p. 143*

Flow Visualization for Injection Molding of Polyethylene and Polystyrene Melts, J. L. White and H. B. Dee, *March, p. 212*

Thermoset Characterization for Moldability Analysis, M. R. Kamal, *March, p. 231*

Melt Viscosity of Poly(Vinyl Chloride) Formulations, L. A. Utracki, *April, p. 308*

Melting of Crystallites in Polymers with Low Degree of Crystallinity Under Shear Flow Conditions. 1: Poly(vinyl chloride), J. Lyngaae-Jørgensen, *May, p. 342*

PVC Melt Rheology III: The Effect of Order and Molecular Weight on the Shear Rate Dependence, E. A. Collins and C. A. Daniels, *May, p. 357*

Crystallization of Polyethylene Oxide Under Shear, A. K. Fritzsche and F. P. Price, *June, p. 401*

Strain History of the Melt in Film Blowing, R. Farber and J. Dealy, *June, p. 435*

Elastic Fracture of Polystyrene Solutions, J. H. Southern and D. R. Paul, *August, p. 560*

The Significance of Capillary Rheology Testing Temperature for Predicting PVC Extrudability, P. L. Shah, *November, p. 773*

Viscometric Behavior of High-Density Polyethylene Solutions at High Temperatures, N. F. Brockmeier and S. P. Westphal, *November, p. 782*

A Special Mold and Tracer Technique for Studying Shear and Extensional Flows in a Mold Cavity During Injection Molding, L. R. Schmidt, *November, p. 797*

Prediction of Melt Elasticity From Viscosity Data, S. I. Abdel-Khalik, O. Hassager, and R. B. Bird, *December, p. 859*

Viscosity and Shear Modulus of PVC-Plastisols During Gelation and Fusion, B. Cayrol, C. Klason, and J. Kubát, *December, p. 868*

152. Sheet

Crack Propagation in Polycarbonate, A. P. Glover, F. A. Johnson, and J. C. Radon, *June, p. 420*

The Anisotropy of Creep Behavior in Oriented Thermoplastics, M. W. Darlington and D. W. Saunders, *September, p. 616*

Predicting Radiant Energy Transmission Through Polymer Sheets, R. C. Progelhof and J. L. Throne, *November, p. 760*

Thermoforming Conditions in Transparent/Opaque Coextruded Sheet, R. C. Progelhof and J. L. Throne, *November, p. 810*

Cold Rolling of Polymers: 4. Toughness Enhancement in Amorphous Polymers, L. J. Broutman and S. Krishnakumar, *December, p. 823*

153. Solubility

A Method for Estimating Both the Solubility Parameters and Molar Volumes of Liquids, R. F. Fedors, *February, p. 147*

A Method for Estimating Both the Solubility Parameters and Molar Volumes of Liquids. Supplement, R. F. Fedors, *June, p. 472*

154. Solutions

A Rheological Study of Aqueous Separan Solutions, R. F. Blanks, H. C. Park, D. R. Patel, and M. C. Hawley, *January, p. 16*

155. Sorption

Vapor and Liquid Equilibria in Glassy Polyblends of Polystyrene and Poly(2, 6-Dimethyl-1, 4-Phenylene Oxide) Part I, C. H. M. Jacques and H. B. Hopfenberg, *June, p. 441*

Kinetics of Vapor and Liquid Transport in Glassy Polyblends of Polystyrene and Poly(2, 6-Dimethyl-1, 4-Phenylene Oxide) Part II, C. H. M. Jacques and H. B. Hopfenberg, *June, p. 449*

156. Stability

Rheological Analysis of Stabilizing Forces in Wire-Coating Dies, Z. Tadmor and R. B. Bird, *February, p. 124*
Prediction of Diallyl Phthalate Molding Performance from Laboratory Tests—I. Characterization and Quality Control of Diallyl Phthalate Compounds, R. Slysh, A. C. Hettinger, and K. E. Guyler, *April, p. 264*
The Concentration and Possible Source of Unstable Sites in PVC, A. R. Berens, *May, p. 318*
Phenylation of PVC With Triphenylaluminum and Related Model Reactions, J. P. Kennedy and M. Ichikawa, *May, p. 322*
Stability of Polymer Composites as Positive-Temperature-Coefficient Resistors, J. Meyer, *October, p. 706*
Behavior of Zirconium Compounds in Polymers—A Review, W. B. Blumenthal, *November, p. 754*

157. Stabilization

The Weathering Degradation of Polyolefins, B. Baum, *March, p. 206*

158. Stabilizers

The Weathering Degradation of Polyolefins, B. Baum, *March. p. 206*
The Influence of Stabilizers on the Fusion of Rigid Poly(Vinyl Chloride), F. R. Kulas and N. P. Thorshaug, *May, p. 366*
Antioxidant-Associated Color Problems in Vinyl Foams, J. T. Renshaw and J. A. Cannon, *June, p. 473*
Photochemistry in the Solid Phase, J. E. Guillet, *July, p. 482*
Stability of Polymer Composites as Positive-Temperature-Coefficient Resistors, J. Meyer, *October, p. 706*

159. Stereochemistry

Protein Structures and Protein Fibers—A Review, F. F. Huang and C. K. Rha, *February, p. 81*

160. Strength

Characterization and Control of a Structural Epoxy Adhesive, R. Fountain, *September, p. 597*
Short- and Long-Term Strength Characteristics of Particulate-Filled Cast Epoxy Resin, H. Hojo, W. Toyoshima, M. Tamura, and N. Kawamura, *September, p. 604*
Superdawn Crystalline Polymers: A New Class of High-Strength Fiber, E. S. Clark and L. S. Scott, *October, p. 682*
A Step Toward Molecular-Level Understanding of the Toughness of Glassy Plastics, A. C. Knight, *October, p. 687*
The Role of Crystallite Dimensions in Mechanical and diffusion Characteristics of Uniaxially Oriented Polymers, D. C. Prevorsek and R. K. Sharma, *November, p. 778*

161. Stress-Strain

Rheological Study of Aqueous Separan Solutions, R. F. Blanks, H. C. Park, D. R. Patel, and M. C. Hawley, *January, p. 16*
Free Radical Formation in Oriented Polybutadiene During Mechanical Deformation Below T_g, W. T. Mead and P. E. Reed, *January, p. 22*
The Mechanical Properties of High-Density Rigid Polyurethane Foams in Compression: I. Modulus, P. J. Phillips and N. R. Waterman, *January, p. 67*
The Mechanical Properties of High-Density Rigid Polyurethane Foams in Compression: II. Yield Behavior, N. R. Waterman and P. J. Phillips, *January, p. 72*
Capillary Rheometry of Raw Elastomers, Butadiene-Acrylonitrile Copolymers, N. Nakajima and E. A. Collins, *February, p. 137*
Stress-strain Behavior of Polychloroprene Vulcanizates Containing Polymer-gel Particles, N. Kawasaki, *February, p. 155*
Structural Relationship Between Thermomechanical History and Strength of Polymeric Solids, S. Matsuoka, *March, p. 162*
Prediction and Evaluation of the Susceptibilities of Glassy Thermoplastics to Environmental Stress Cracking, L. F. Henry, *March, p. 167*
Key Indicators for Plastics Performance in Consumer Products, R. S. Hagan and J. R. Thomas, *March, p. 177*
Rapid Flexural Creep and Engineering, Analysis for Product Design of a Propylene Copolymer, C. J. Aloisio, Jr., and R. R. Cammons, *March, p. 189*
Flow Visualization for Injection Molding of Polyethylene and Polystyrene Melts, J. L. White and H. B. Dee, *March, p. 212*
Cold Rolling of Polymers—3. Properties of Rolled Crystallized Polycarbonates, T. Kobayashi and L. J. Broutman, *April, p. 260*
Tensile Crazing and Shear Banding of Styrene A: Temperature and Rate Effects, J. N. Sultan and F. J. McGarry, *April, p. 282*
Friction and Friction-Generated Temperature at a Polymer-Metal Interface, H. L. Price and H. D. Burks, *April, p. 288*
Melt Viscosity of Poly(Vinyl Chloride) Formulations, L. A. Utracki, *April, p. 308*
Strain History of the Melt in Film Blowing. R. Farber and J. Dealy, *June, p. 435*
A Design Approach for Thermoplastic Flexure Components Subjected to Cyclic Loading, D. McCammond and F. Nakatsumi, *August, p. 545*
Elastic Fracture of Polystyrene Solutions, J. H. Southern and D. R. Paul, *August, p. 560*
A Comparison Between Simple Shear, Elongation, and Equal Biaxial Extension Deformations, F. N. Cogswell and D. R. Moore, *August, p. 573*
16-Year Creep of Polyethylene and PVC, W. N. Findley and J. F. Tracy, *August, p. 577*
A Theoretical Study of the Effect of an Interfacial Layer on the Properties of Composites, L. J. Broutman and B. D. Agarwal, *August, p. 581*
Short- and Long-Term Strength Characteristics of Particulate-Filled Cast Epoxy Resin, H. Hojo, W. Toyoshima, M. Tamura, and N. Kawamura, *September, p. 604*
Strain Recovery of Polyester and Nylon 66 Monofilaments Under Various Temperature Histories, A. C. Lunn, B-L. Lee, and I. V. Yannas, *September, p. 610*
Plastic Deformation and Structure of Extruded Polymer Solids, A. Peterlin, *September, p. 627*
The Mechanical Properties of Oriented Discontinuous Fiber-Reinforced Thermoplastics. 1. Unidirectional Fiber Orientation, B. F. Blumentritt, B. T. Vu, and S. L. Cooper, *September, p. 633*
Hydrostatic Extrusion of Solid Polyethylene, L. A. Davis, *September, p. 641*
Mechanical Properties of Certain Oriented Crystalline Polymers, H. W. Starkweather, Jr., T. F. Jordan, and G. B. Dunnington, *October, p. 678*
A Step Toward Molecular-Level Understanding of the Toughness of Glassy Plastics, A. C. Knight, *October, p. 687*
The Effect of Sudden Strain-Rate Change on the Yield Behavior of Bisphenol-A Polycarbonate, A. F. Yee and P. B. Detorres, *October, p. 691*
Dilatometric Studies of Polymers Undergoing High and Low Rate Tensile Deformation, L. C. Cessna, *October, p. 696*
Characterization of Mechanical Properties of Thermoplastic Films by Creep Measurements, J. R. Huntsberger, *October, p. 702*
Thermal Expansion Instability and Effect on Creep of a Highly Crosslinked Polyurethane, W. N. Findley and R. M. Reed, *October, p. 724*
Blade-Coating of a Viscoelastic Fluid, Y. Greener and S. Middleman, *November, p. 791*
Nature of Fatigue Behavior and Effect of Flaw Size in Polystyrene, A. D. McMaster, D. R. Morrow and J. A. Sauer, *November, p. 801*
The Influence of Additives on the Flow Behavior of ABS, L. L. Blyler, Jr., *November, p. 806*
Molding Polycarbonate: Moisture Degradation Effect on Physical and Chemical Properties, T. S. Long and R. J. Sokol, *December, p. 817*
Effects of a Fluid Environment on the Stiffness of Polymers, D. McCammond and C. A. Ward, *December, p. 831*
Packing and Discharge in Injection Molding, Y. T. Koita, *December, p. 840*
Prediction of Melt Elasticity From Viscosity Data, S. I. Abdel-Khalik, O. Hassager, and R. B. Bird, *December, p. 859*

162. Structure

Structural Relationship Between Thermomechanical History and Strength of Polymeric Solids, S. Matsuoka, *March, p. 162*
Key Indicators for Plastics Performance in Consumer Products. R. S. Hagan and J. R. Thomas, *March, p. 177*
Structure and Properties of Flexible Vinyl Foams, R. D. Deanin, V. C. Kapasi, C. N. Georgacopoulos and R. J. Picard, *March, p. 193*
Polyvinyl Chloride Insoluble Gels: Their Structure and Effect on Properties of Cast Films, F. E. Filisko, *May, p. 352*

Processing-Morphology-Property Studies of Poly(Vinyl Chloride), C. Singleton, J. Isner, D. M. Gezovich, P. K. C. Tsou, P. H. Geil, and E. A. Collins, *May, p. 371*

Factors Affecting the Sensitivity of E-Beam Resists, T. L. Brewer, *July, p. 534*

Linear Polycarboranesiloxanes, M. B. Roller and J. K. Gillham, *August, p. 567*

Mechanical Properties of Certain Oriented Crystalline Polymers, H. W. Starkweather, Jr., T. F. Jordan, and G. B. Dunnington, *October, p. 678*

A Step Toward Molecular-Level Understanding of the Toughness of Glassy Plastics, A. C. Knight, *October, p. 687*

Stability of Polymer Composites as Positive-Temperature-Coefficient Resistors, J. Meyer, *October, p. 706*

163. Surface Area

The Surface Area of Bulk Poly(Vinyl Chloride), R. Salovey, R. Cortellucci, and A. Roaldi, *February, p. 120*

164. Surface Properties

Prediction and Evaluation of the Susceptibilities of Glassy Thermoplastics to Environmental Stress Cracking, L. F. Henry, *March, p. 167*

Liquid Flow Through Aligned Fiber Beds, J. G. Williams, C. E. M. Morris, and B. C. Ennis, *June, p. 413*

Phase Behavior of Polybutene-1 Plus Polystyrene in Carbon Tetrachloride, B. H. Clampitt, *December, p. 827*

T

165. Temperature Dependence

Time-Temperature Superposition in Two-Phase Polyblends, D. Kaplan and N. W. Tschoegl, *January, p. 43*

Time-Temperature Superpositioning of Viscosity-Time Profiles of Three High Temperature Epoxy Resins, R. P. White, Jr., *January, p. 50*

The Mechanical Properties of High-Density Rigid Polyurethane Foams in Compression: I. Modulus, P. J. Phillips and N. R. Waterman, *January, p. 67*

The Mechanical Properties of High-Density Rigid Polyurethane Foams in Compression: II. Yield Behavior, N. R. Waterman and P. J. Phillips, *January, p. 72*

Morphology of a Polyurethane-Polyacrylate Interpenetrating Polymer Network, K. C. Frisch, D. Klempner, S. Migdal, H. L. Frisch and H. Ghiradella, *January, p. 76*

The Plasticating Process in Injection Molding, R. C. Donovan, *February, p. 101*

A Method for Estimating Both the Solubility Parameters and Molar Volumes of Liquids, R. F. Fedors, *February, p. 147*

Key Indicators for Plastics Performance in Consumer Products, R. S. Hagan and J. R. Thomas, *March, p. 177*

Rapid Flexural Creep and Engineering Analysis for Product Design of a Propylene Copolymer, C. J. Aloisio, Jr. and R. R. Cammons, *March, p. 189*

The Solution of Plastics Prediction Problems by Thermoanalytical Techniques, H. E. Bair, *March, p. 202*

The Weathering Degradation of Polyolefins, B. Baum, *March, p. 206*

Simulation of the Mold-Filling Process, P.-C. Wu, C. F. Huang, and C. G. Gogos, *March, p. 223*

Thermoset Characterization for Moldability Analysis, M. R. Kamal, *March, p. 231*

Prediction of Diallyl Phthalate Molding Performance from Laboratory Tests—I. Characterization and Quality Control of Diallyl Phthalate Compounds, R. Slysh, A. C. Hettinger, and K. E. Guyler, *April, p. 264*

Friction and Friction-Generated Temperature at a Polymer-Metal Interface, H. L. Price and H. D. Burks, *April, p. 288*

Design of Extruder Dies Using Thermoplastic Melt Properties Data, P. C. Powell, *April, p. 298*

The Concentration and Possible Source of Unstable Sites in PVC, A. R. Berens, *May, p. 318*

Phenylation of PVC With Triphenylaluminum and Related Model Reactions, J. P. Kennedy and M. Ichikawa, *May, p. 322*

PVC Melt Rheology III: The Effect of Order and Molecular Weight on the Shear Rate Dependence, E. A. Collins and C. A. Daniels, *May, p. 357*

The Influence of Crystallinity on the Beta-Transition in Poly(Vinyl Chloride), E. R. Harrell, Jr. and R. P. Chartoff, *May, p. 362*

The Influence of Stabilizers on the Fusion of Rigid Poly(Vinyl Chloride), F. R. Kulås and N. P. Thorshaug, *May, p. 366*

High-Frequency Alpha Transition Response of Some Plasticized Poly(Vinyl Chloride) Compositions, G. W. Paddison, *May, p. 382*

Crystallization of Polyethylene Oxide Under Shear, A. K. Fritzsche and F. P. Price, *June, p. 401*

Crack Propagation in Polycarbonate, A. P. Glover, F. A. Johnson, and J. C. Radon, *June, p. 420*

Strain History of the Melt in Film Blowing, R. Farber and J. Dealy, *June, p. 435*

Vapor and Liquid Equilibria in Glassy Polyblends of Polystyrene and Poly(2,6-Dimethyl-1,4-Phenylene Oxide) Part I, C. H. M. Jacques and H. B. Hopfenberg, *June, p. 441*

Kinetics of Vapor and Liquid Transport in Glassy Polyblends of Polystyrene and Poly(2,6-Dimethyl-1,4-Phenylene Oxide) Part II, C. H. M. Jacques and H. B. Hopfenberg, *June, p. 449*

Azide Photoresists for Projection Photolithography, N. J. Clecak, R. J. Cox, and W. M. Moreau, *July, p. 491*

Vapor Development of Poly (Olefin Sulfone) Resists, M. J. Bowden and L. F. Thompson, *July, p. 525*

Linear Polycarboranesiloxanes. M. B. Roller and J. K. Gillham, *August, p. 567*

Pressure Generation Mechanisms in the Feed Section of Screw Extruders, J. G. A. Lovegrove and J. G. Williams, *August, p. 589*

Short- and Long-Term Strength Characteristics of Particulate-Filled Cast Epoxy Resin, H. Hojo, W. Toyoshima, M. Tamura, and N. Kawamura, *September, p. 604*

Strain Recovery of Polyester and Nylon 66 Monofilaments Under Various Temperature Histories, A. C. Lunn, B-L. Lee and I. V. Yannas, *September, p. 610*

Plastic Deformation and Structure of Extruded Polymer Solids, A. Peterlin, *September, p. 627*

Glass Transitions of Topologically Interpenetrating Polymer Networks, H. L. Frisch, K. C. Frisch, and D. Klempner, *September, p. 646*

End Corrections in the Capillary Flow of Polystyrene Melts, K. S. Hyun, *September, p. 666*

Transport Properties of Polyvinylpyridinium Anion-Exchange Membranes, R. A. Wallace and N. V. Vijayaraghavan, *September, p. 674*

Superdawn Crystalline Polymers: A New Class of High-Strength Fiber, E. S. Clark and L. S. Scott, *October, p. 682*

A Step Toward Molecular-Level Understanding of the Toughness of Glassy Plastics, A. C. Knight, *October, p. 687*

The Effect of Sudden Strain-Rate Change on the Yield Behavior of Bisphenol-A Polycarbonate, A. F. Yee and P. B. Detorres, *October, p. 691*

Dilatometric Studies of Polymers Undergoing High and Low Rate Tensile Deformation, L. C. Cessna, *October, p. 696*

Characterization of Mechanical Properties of Thermoplastic Films by Creep Measurements, J. R. Huntsberger, *October, p. 702*

Thermal Expansion Instability and Effect on Creep of a Highly Crosslinked Polyurethane, W. N. Findley and R. M. Reed, *October, p. 724*

A Study of Chain Addition Polymerizations with Temperature Variations: 1. Thermal Drift and Its Effect on Polymer Properties, J. A. Biesenberger and R. Capinpin, *November, p. 737*

Heat Distortion and Mechanical Properties of Polymers by Thermal-Mechanical Analysis, A. T. Riga, *November, p. 764*

The Significance of Capillary Rheology Testing for Predicting PVC Extrudability, P. L. Shah, *November, p. 773*

Viscometric Behavior of High-Density Polyethylene Solutions at High Temperatures, N. F. Brockmeier and S. P. Westphal, *November, p. 782*

Thermoforming Conditions in Transparent/Opaque Coextruded Sheet, R. C. Progelhof and J. L. Throne, *November, p. 810*

Extruder Scale-Up by Computer, B. H. Maddock, *December, p. 853*

Viscosity and Shear Modulus of PVC-Plastisols During Gelation and Fusion, B. Cayrol, C. Klason, and J. Kubát, *December, p. 868*

166. Tensile Properties

Free Radical Formation in Oriented Polybutadiene During Mechanical Deformation Below T_g, W. T. Mead and P. E. Reed, *January, p. 22*

Capillary Rheometry of Raw Elastomers, Butadiene-Acrylonitrile Copolymers, N. Nakajima and E. A. Collins, *February, p. 137*

Stress-strain Behavior of Polychloroprene Vulcanizates Containing Polymer-gel Particles, N. Kawasaki, *February, p. 155*

Key Indicators for Plastics Performance in Consumer Products, R. S. Hagan and J. R. Thomas, *March, p. 177*

Structure and Properties of Flexible Vinyl Foams, R. D. Deanin, V. C. Kapasi, C. N. Georgacopoulos, and R. J. Picard, *March, p. 193*

The Weathering Degradation of Polyolefins, B. Baum, *March, p. 206*

Thermoset Characterization for Moldability Analysis, M. R. Kamal, *March, p. 231*

The Processing and Aging of Boron/Epoxy Composite Materials, J. F. Jones, T. T. Bartels and R. Fountain, *March, p. 240*

Cold Rolling of Polymers—3. Properties of Rolled Crystallized Polycarbonates, T. Kobayashi and L. J. Broutman, *April, p. 260*

Tensile Crazing and Shear Banding of Styrene A: Temperature and Rate Effects, J. N. Sultan and F. J. McGarry, *April, p. 282*

Design of Extruder Dies Using Thermoplastics Melt Properties Data, P. C. Powell, *April, p. 298*

Polyvinyl Chloride Insoluble Gels: Their Structure and Effect on Properties of Cast Films, F. E. Filisko, *May, p. 352*

The Influence of Crystallinity on the Beta-Transition in Poly(Vinyl Chloride, E. R. Harrell, Jr. and R. P. Chartoff, *May, p. 362*

Mechanical Properties of Impregnated Asbestos-Cement, P. Godard, P. Delvaux, M. Della Faille, and J. P. Mercier, *June, p. 429*

Short- and Long-Term Strength Characteristics of Particulate-Filled Cast Epoxy Resin, H. Hojo, W. Toyoshima, M. Tamura, and N. Kawamura, *September, p. 604*

The Mechanical Properties of Oriented Discontinous Fiber-Reinforced Thermoplastics. 1. Unidirectional Fiber Orientation, B. F. Blumentritt, B. T. Vu, and S. L. Cooper, *September, p. 633*

Hydrostatic Extrusion of Solid Polyethylene, L. A. Davis, *September, p. 641*

Mechanical Properties of Certain Oriented Crystalline Polymers, H. W. Starkweather, Jr., T. F. Jordan, and G. B. Dunnington, *October, p. 678*

Superdawn Crystalline Polymers: A New Class of High-Strength Fiber, E. S. Clark and L. S. Scott, *October, p. 682*

Effects of a Fluid Environment on the Stiffness of Polymers, D. McCammond and C. A. Ward, *December, p. 831*

Molding Polycarbonate: Moisture Degradation Effect on Physical and Chemical Properties, T. S. Long and R. J. Sokol, *December, p. 817*

Viscosity and Shear Modulus of PVC-Plastisols During Gelation and Fusion, B. Cayrol, C. Klason, and J. Kubàt, *December, p. 868*

167. Testing

Characterization and Control of a Structural Epoxy Adhesive, R. Fountain, *September, p. 597*

Heat Distortion and Mechanical Properties of Polymers by Thermal-Mechanical Analysis, A. T. Riga, *November, p. 764*

168. Theoretical Model

A New Thickness Sensor Based on the Hall Effect, M. Okuyama, K. Yagii, S. C. Sharda, and N. W. Tschoegl, *January, p. 38*

Theoretical Model for Nonintermeshing Twin Screw Extruders. A. Kaplan and Z. Tadmor, *January, p. 58*

The Plasticating Process in Injection Molding, R. C. Donovan, *February, p. 101*

Dynamic Model of a Plasticating Extruder, Z. Tadmor, S. D. Kipshitz, and R. Lavie, *February, p. 112*

Rheological Analysis of Stabilizing Forces in Wire-Coating Dies, Z. Tadmor and R. B. Bird, *February, p. 124*

Stress-strain Behavior of Polychloroprene Vulcanizates Containing Polymer-gel Particles, N. Kawasaki, *February, p. 155*

Phenylation of PVC With Triphenylaluminum and Related Model Reactions, J. P. Kennedy and M. Ichikawa, *May, p. 322*

A Dynamical Theory of Elastic Micro-Dielectric Polymers, M. Shahinpoor and H. Kalhor, *June, p. 464*

Computer Simulation Study of Images in Contact and Near-Contact Printing, B. J. Lin, *July, p. 498*

A Design Approach for Thermoplastic Flexure Components Subjected to Cyclic Loading, D. McCammond and F. Nakatsumi, *August, p. 545*

A Melting Model for Reciprocating Screw Injection-Molding Machines, S. D. Lipshitz, R. Lavie, and Z. Tadmor, *August, p. 553*

A Theoretical Study of the Effect of an Interfacial Layer on the Properties of Composites, L. J. Broutman and B. D. Agarwal, *August, p. 581*

Glass Transitions of Topologically Interpenetrating Polymer Networks, H. L. Frisch, K. C. Frisch, and D. Klempner, *September, p. 646*

Flow Analysis Network (FAN)—A Method for Solving Flow Problems in Polymer Processing, Z. Tadmor, E. Broyer, and C. Gutfinger, *September, p. 660*

Thermodynamics of Dissipative Materials with Entropic Elasticity, G. Astarita, *October, p. 730*

A Study of Chain Addition Polymerizations with Temperature Variations: 1. Thermal Drift and Its Effect on Polymer Properties, J. A. Biesenberger and R. Capinpin, *November, p. 737*

Predicting Radiant Energy Transmission Through Polymer Sheets, R. C. Progelhof and J. L. Throne, *November, p. 760*

A Design Approach to a Computer-Controlled Injection-Molding Machine, C. Y. W. Ma, *November, p. 768*

Viscometric Behavior of High-Density Polyethylene Solutions at High Temperatures, N. F. Brockmeier and S. P. Westphal, *November, p. 782*

Blade-Coating of a Viscoelastic Fluid, Y. Greener and S. Middleman, *November, p. 791*

Thermoforming Conditions in Transparent/Opaque Coextruded Sheet, R. C. Progelhof and J. L. Throne, *November, p. 810*

Prediction of Melt Elasticity From Viscosity Data, S. I. Abdel-Khalik, O. Hassager, and R. B. Bird, *December, p. 859*

169. Thermal Drift

A Study of Chain Addition Polymerizations with Temperature Variations: 1. Thermal Drift and Its Effect on Polymer Properties, J. A. Biesenberger and R. Capinpin, *November, p. 737*

170. Thermal Expansion

Thermal Expansion Instability and Effect on Creep of a Highly Crosslinked Polyurethane, W. N. Findley and R. M. Reed, *October, p. 724*

171. Thermodynamics

A Method for Estimating Both the Solubility Parameters and Molar Volumes of Liquids, R. F. Fedors, *February, p. 147*

A Method for Estimating Both the Solubility Parameters and Molar Volumes of Liquids. Supplement, R. F. Fedors, *June, p. 472*

Thermodynamics of Dissipative Materials with Entropic Elasticity, G. Astarita, *October, p. 730*

172. Thermoforming

Thermoforming Conditions in Transparent/Opaque Coextruded Sheet, R. C. Progelhof and J. L. Throne, *November, p. 810*

173. Thermomechanical Properties

Structural Relationship Between Thermomechanical History and Strength of Polymeric Solids, S. Matsuoka, *March, p. 162*

Linear-Polycarboranesiloxanes, M. B. Roller and J. K. Gillham, *August, p. 567*

174. Thermoplastics

Prediction and Evaluation of the Susceptibilities of Glassy Thermoplastics to Environmental Stress Cracking, L. F. Henry, *March, p. 167*

The Anisotropy of Creep Behavior in Oriented Thermoplastics, M. W. Darlington and D. W. Saunders, *September, p. 616*

The Mechanical Properties of Oriented Discontinuous Fiber-Reinforced Thermoplastics. 1. Unidirectional Fiber Orientation, B. F. Blumentritt, B. T. Vu and S. L. Cooper, *September, p. 633*

Heat Distortion and Mechanical Properties of Polymers by Thermal-Mechanical Analysis, A. T. Riga, *November, p. 764*

Segmented Polyether Ester Copolymers—A New Generation of High Performance Thermoplastic Elastomers, G. K. Hoeschele, *December, p. 848*

175. Thermosets

Thermoset Characterization for Moldability Analysis, M. R. Kamal, *March, p. 231*

Heat Distortion and Mechanical Properties of Polymers by Thermal-Mechanical Analysis, A. T. Riga, *November, p. 764*

176. Thickness

Cold Rolling of Polymers—2. Toughness Enhancement in Amorphous Polycarbonates, L. J. Broutman and S. M. Krishnakumar, *April, p. 249*

Cold Rolling of Polymers—3. Properties of Rolled Crystallized Polycarbonates, T. Kobayashi and L. J. Broutman, *April, p. 260*

A Theoretical Study of the Effect of an Interfacial Layer on the Properties of Composites, L. J. Broutman and B. D. Agarwal, *August, p. 581*

177. Time Dependence

Time-Temperature Superposition in Two-Phase Polyblends, D. Kaplan and N. W. Tschoegl, *January, p. 43*

Time-Temperature Superpositioning of Viscosity-Time Profiles of Three High Temperature Epoxy Resins, R. P. White, Jr., *January, p. 50*

Dynamic Model of a Plasticating Extruder, Z. Tadmor, S. D. Lipshitz, and R. Lavie, *February, p. 112*

Chemical Thickening of Low Profile Polyester Resin Systems, F. R. Volgstadt and C. L. Sieglaff, *February, p. 143*

Rapid Flexural Creep and Engineering Analysis for Product Design of a Propylene Copolymer, C. J. Aloisio, Jr. and R. R. Cammons, *March, p. 189*

Suspension Polymerization of Vinyl Chloride in the Presence of Propane, A. Michel and A. Guyot, *May, p. 338*

Crystallization of Polyethylene Oxide Under Shear, A. K. Fritzsche and F. P. Price, *June, p. 401*

A Comparison Between Simple Shear, Elongation, and Equal Biaxial Extension Deformations, F. N. Cogswell and D. R. Moore, *August, p. 573*

The Anisotropy of Creep Behavior in Oriented Thermoplastics, M. W. Darlington and D. W. Saunders, *September, p. 616*

Characterization of Mechanical Properties of Thermoplastic Films by Creep Measurements, J. R. Huntsberger, *October, p. 702*

Stability of Polymer Composites as Positive-Temperature-Coefficient Resists, J. Meyer, *October, p. 706*

178. Toughness

Cold Rolling of Polymers—2. Toughness Enhancement in Amorphous Polycarbonates, L. J. Broutman and S. M. Krishnakumar, *April, p. 249*

Cold Rolling of Polymers: 4. Toughness Enhancement in Amorphous Polymers, L. J. Broutman and S. Krishnakumar, *December, p. 823*

V

179. Vinyls

Structure and Properties of Flexible Vinyl Foams, R. D. Deanin, V. C. Kapasi, C. N. Georgacopoulos, and R. J. Picard, *March, p. 193*

Antioxidant-Associated Color Problems in Vinyl Foams, J. T. Renshaw and J. A. Cannon, *June, p. 473*

180. Viscosity

Time-Temperature Superpositioning of Viscosity-Time Profiles of Three High Temperature Epoxy Resins, R. P. White, Jr., *January, p. 50*

The Measurement of Melt Flow and Melt Stability, R. Longworth, *February, p. 98*

Capillary Rheometry of Raw Elastomers, Butadiene-Acrylonitrile Copolymers, N. Nakajima and E. A. Collins, *February, p. 137*

Chemical Thickening of Low Profile Polyester Resin Systems, F. R. Volgstadt and C. L. Sieglaff, *February, p. 143*

Key Indicators for Plastics Performance in Consumer Products, R. S. Hagan and J. R. Thomas, *March, p. 177*

Thermoset Characterization for Moldability Analysis, M. R. Kamal, *March, p. 231*

Prediction of Diallyl Phthalate Molding Performance from Laboratory Tests—II. Comparison of Mechanical Spectrometer and Brabender Torque Rheometer, P. E. Willard, *April, p. 273*

A Sliding Scale Method for Rapid Interpretation of Rheological Measurements, A. Ziabicki and G. Szenberg, *April, p. 292*

Melt Viscosity of Poly(Vinyl Chloride) Formulations, L. A. Utracki, *April, p. 308*

Crystallization of Polyethylene Oxide Under Shear, A. K. Fritzsche and F. P. Price, *June, p. 401*

Strain History of the Melt in Film Blowing, R. Farber and J. Dealy, *June, p. 435*

End Corrections in the Capillary Flow of Polystyrene Melts, K. S. Hyun, *September, p. 666*

Characterization of Mechanical Properties of Thermoplastics Films by Creep Measurements, J. R. Huntsberger, *October, p. 702*

The Significance of Capillary Rheology Testing Temperature for Predicting PVC Extrudability, P. L. Shah, *November, p. 773*

Viscometric Behavior of High-Density Polyethylene Solutions at High Temperatures, N. F. Brockmeier and S. P. Westphal, *November, p. 782*

The Influence of Additives on the Flow Behavior of ABS, L. L. Blyler, Jr., *November, p. 806*

Phase Behavior of Polybutene-1 Plus Polystyrene in Carbon Tetrachloride, B. H. Clampitt, *December, p. 827*

Prediction of Melt Elasticity From Viscosity Data, S. I. Abdel-Khalik, O. Hassager, and R. B. Bird, *December, p. 859*

Viscosity and Shear Modulus of PVC-Plastisols During Gelation and Fusion, B. Cayrol, C. Klason, and J. Kubát, *December, p. 868*

W

181. Weathering

The Weathering Degradation of Polyolefins, B. Baum, *March, p. 206*

Y

182. Yield Behavior

The Mechanical Properties of High-Density Rigid Polyurethane Foams in Compression: II. Yield Behavior, N. R. Waterman and P. J. Phillips, *January, p. 72*

The Effect of Sudden Strain-Rate Change on the Yield Behavior of Bisphenol-A Polycarbonate, A. F. Yee and P. B. Detorres, *October, p. 691*

Z

183. Zirconium

Behavior of Zirconium Compounds in Polymers—A Review, W. B. Blumenthal, *November, p. 754*

AUTHORS' INDEX

Numbers refer to category headings under "Subject and Title Index;" i.e., 91 see "Nylon."
